

BLOCKCHAIN PORTFOLIO

Blockchain Solutions

Our robust Blockchain solutions offer dynamic capabilities to various businesses looking for unparalleled scalability and technological advancement. Being at the center of it all, Internet Soft redefines how the world looks at data & digital transactions.

Applying Blockchain across Industries and Professions:

- BFSI & Fintech
- Supply Chain
- Real Estate
- Health Care

- Security Token Offering
- Blockchain Product Development
- Decentralized Finance Application Development
- Enterprise Blockchain Development
- Smart Contract Auditing
- Stablecoin Development
- Custom Blockchain Development

Platforms We are Experts In

Internet Soft Services

Solution We are Building

Supply Chain Leveraging Blockchain

A Blockchain-based solution helps determine and prove a product's provenance and securely track & trace precisely where the product is in a Global Supply Chain.

Patient Data Storing and Sharing leveraging Blockchain

Internet Soft patient data sharing application leveraged by Blockchain technology helps secure EHR or EMR data, ensuring privacy is never compromised. It also enables you to safely share the data at will with pharmacies, doctors, etc.

Blockchain Solution for Property Title

A blockchain solution for property titles will positively change one thing before everything else: trust between the buyer and the seller. Since records will stay permanently stored securely, there will never be any dispute, eliminating the need for 3rd party title companies.

Internet Soft Services

Solution We are Building

KYC over Blockchain

Getting KYCs through Blockchain technology is an end-to-end solution that can help tech startups or financial institutions fasten and simplify their onboard customer process, boosting their compliance quotient and saving resources.

Internet Soft Services

Token Sale Investor Dashboard

End-to-end ICO Services

An ICO is the most effective way to gain investments and funding for businesses today. We at Internet Soft provide full-circle ICO services such as platform hosting, token creation, and distribution.

Token Sale Smart Contracts

If you're looking for secure smart contracts for your token sale, you've landed at the right place. Our configurable smart contracts solution will ensure quick and easy deployment for your token sale.

Cryptocurrency Wallet

With the ever-increasing demand for cryptocurrencies and the influx of ICOs in the market, there is a constant need for digital currency security. Enter Blockchain-based wallets! A cryptocurrency wallet is a 100% secure system that allows one to receive, send and manage cryptocurrencies from one centralized portal, making the process efficient and seamless. This also helps investors manage token transactions.

Internet Soft Services

Token Sale Investor Dashboard

Bounty Campaign Portal

Have support for your business' token sale or ICO, but bounty campaign management seems too harsh an ordeal? Boost your ICO thanks to our comprehensive Bounty Campaign Portal, which brings in all kinds of features and services under one umbrella. All you need to do is make a few clicks, and you can easily manage Bounty Campaigns, irrespective of their scale and depth.

- Transparency
- Community

<https://bonesclub.io/>

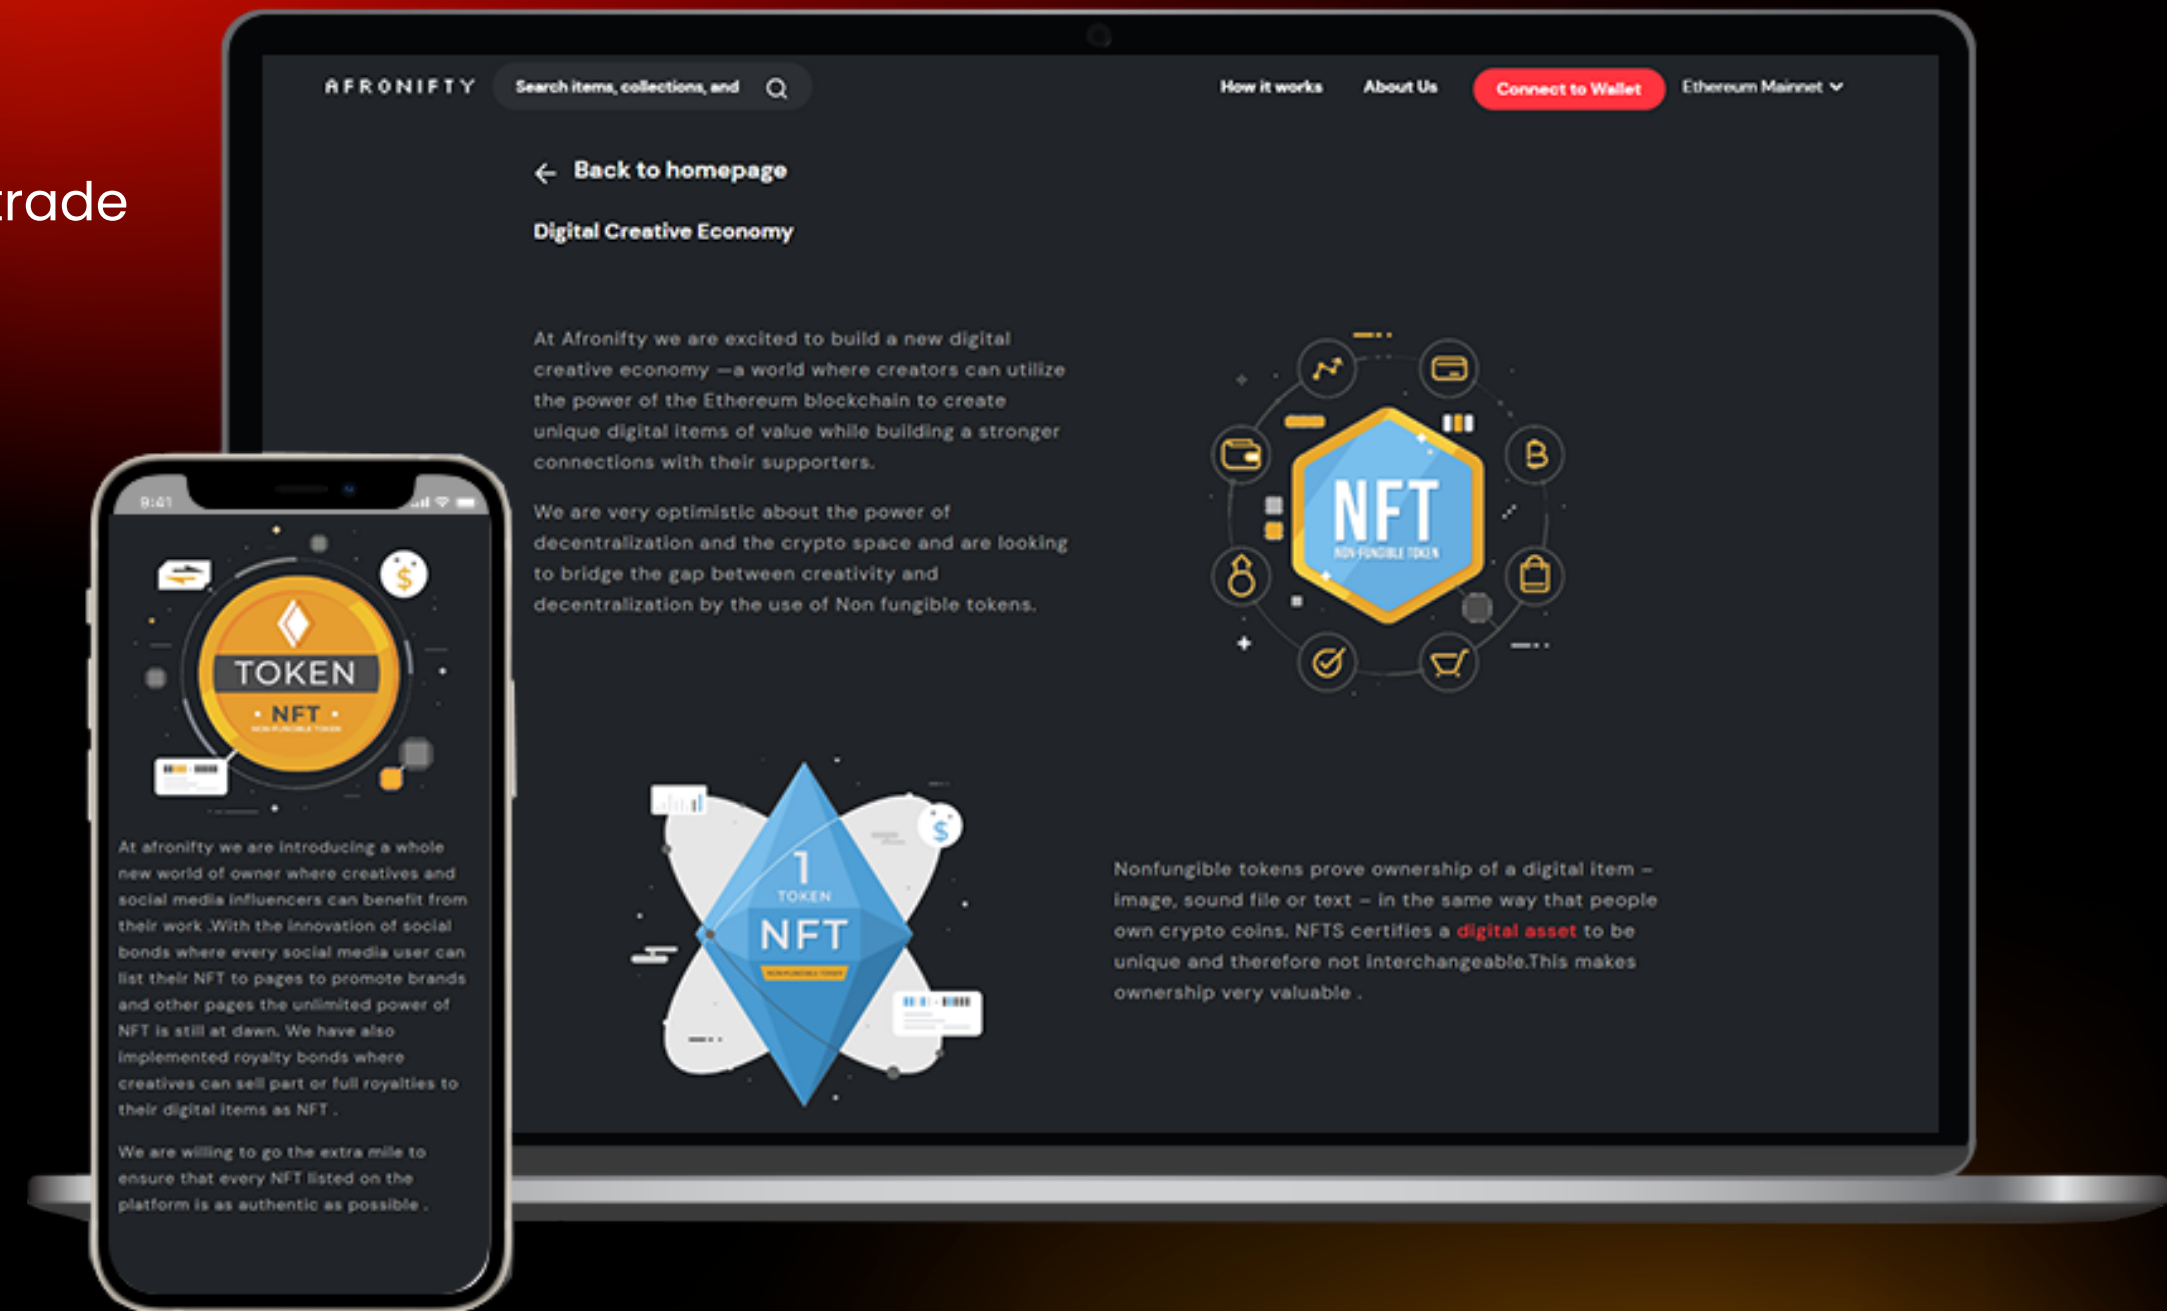

Afronifty

Project Description

Turning your creativity into NFTs. Buy, sell and trade exclusively NFTs and digital assets.

Project Features

- NFTS impose digital scarcity on an open internet, therefore, giving the asset value due to the tied ownership. AS the world continues to digitize, anything you make, even if it took a lot of time and resources to make, as soon as you put that creation on the internet, the price goes to zero because the cost of reproducing it is zero, simply because anybody can download it with no ownership and originality attached to it, NFS attach proven ownership and identity to digital items to provide digital scarcity in an open internet without lack through the verified authenticity of the blockchain.

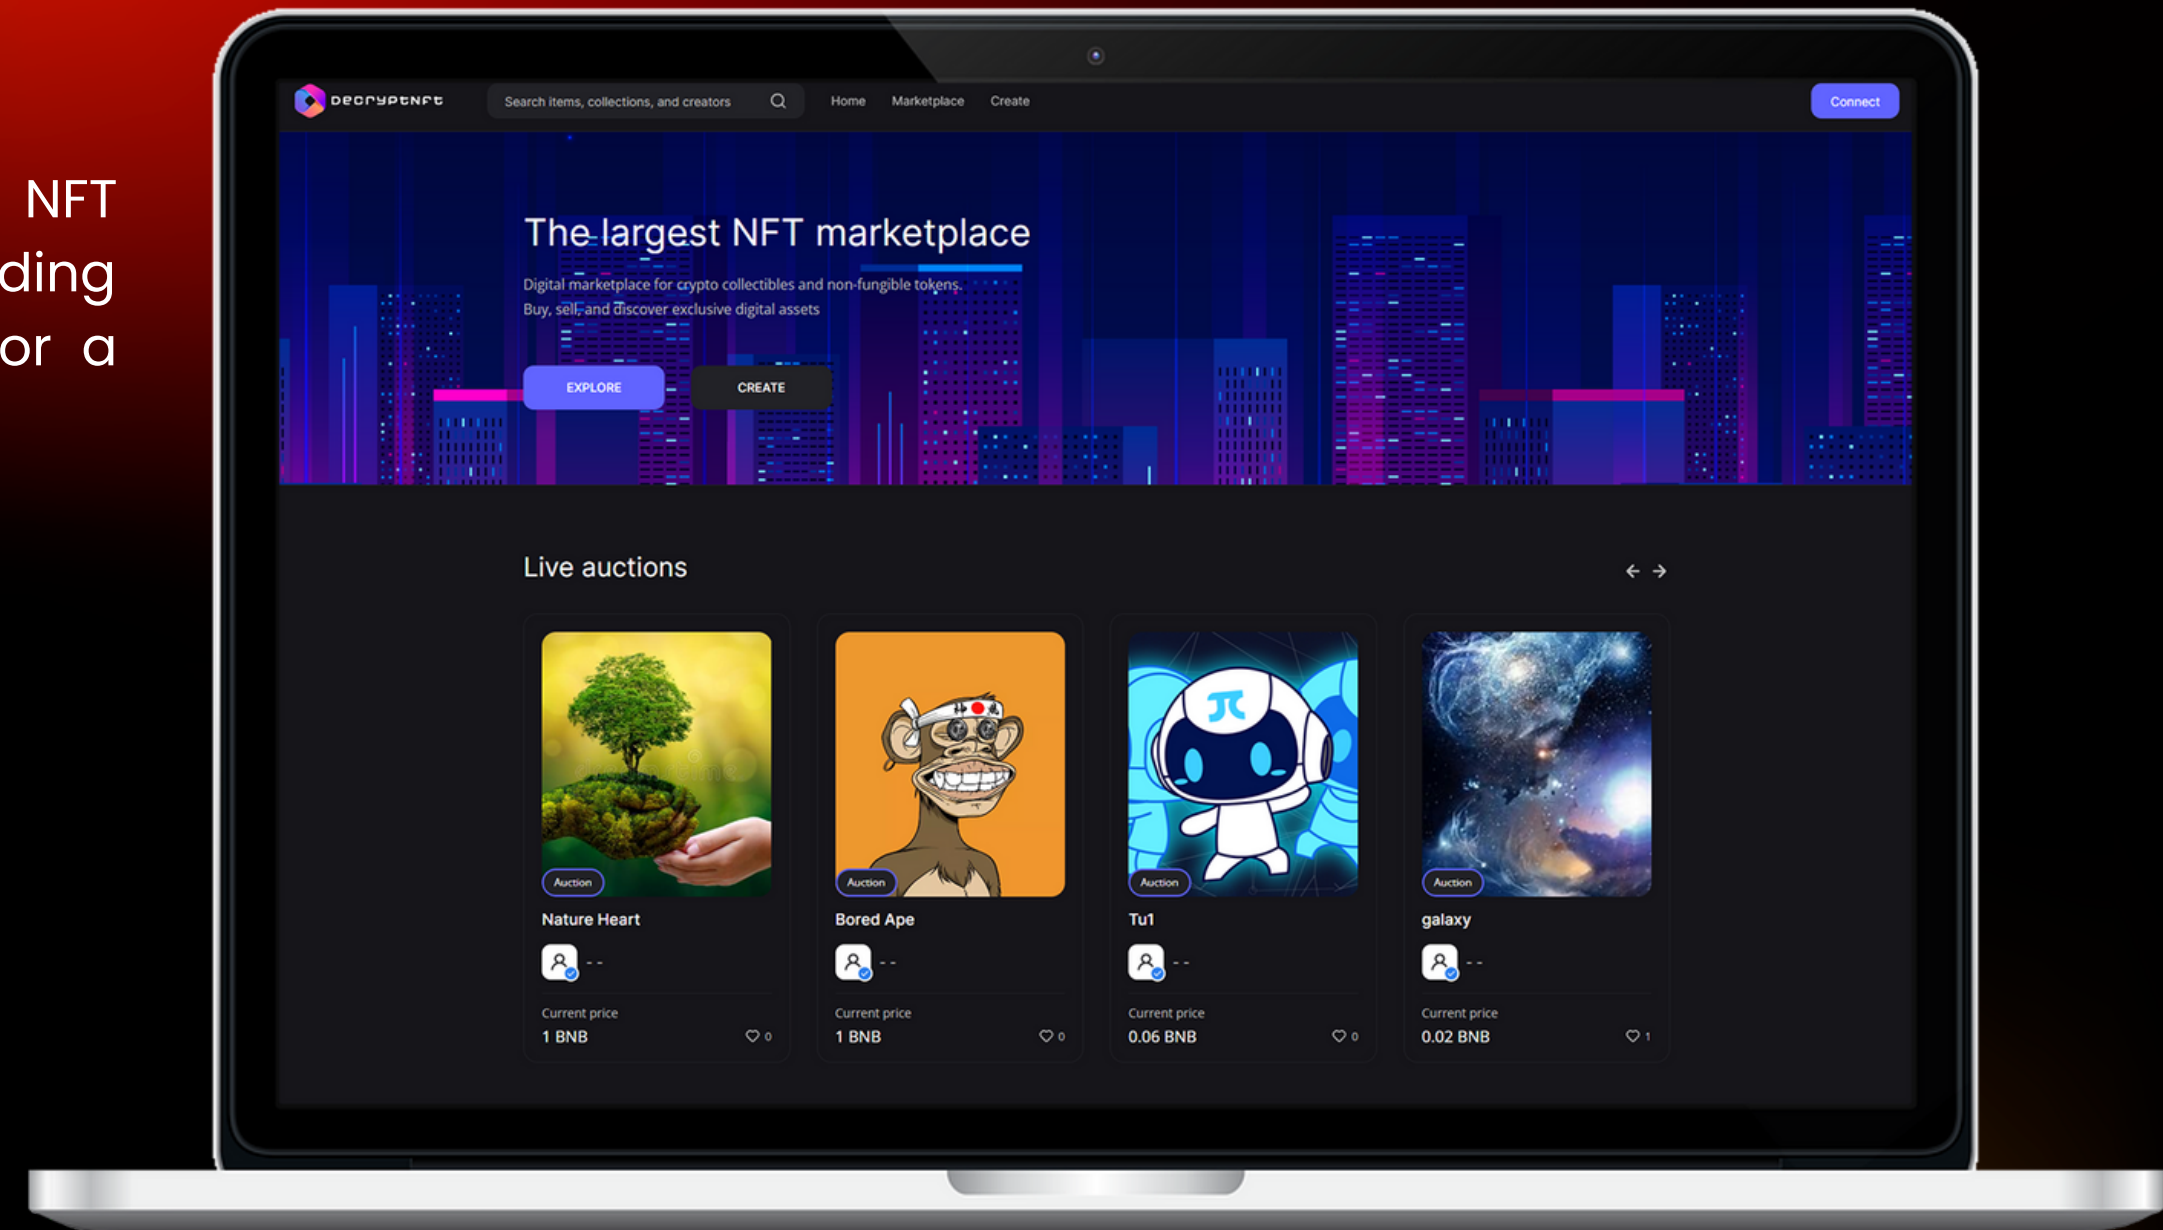

<https://afronifty.com/>

Decrypt NFT

Project Description

Decrypt NFT is a cross-platform interoperable NFT marketplace that addresses current issues surrounding non-fungible tokens and aims to dissolve them for a better NFT experience for artists and resellers.

<https://api.decryptnft.io/>
