Competitive Pricing

Quick Turn Around

Disaster Recovery Management

Flexible Engagement Model

HEALTHCARE

Enabling HSPs to optimize or re-invent their digital capabilities in order to address patient needs in a better, collaborative and efficient way.

- **Custom EMR/EHR Solutions**

  Streamline patient data, optimize workflows to make better diagnostics and treatment decisions.

- **Hospital & Practice Management Solutions**

  Drive administrative efficiency, enhance revenue growth, improve cost and quality of care.

- **Fitness Apps**

  Develop solutions integrated with wearable technology or other medical hardware to track vitals, exercise routines, or sleep patterns etc.

- **Telehealth Solutions**

  Provide technology-assisted ancillary services during primary care or urgent care through easy-to-use patient engagement systems, and on-demand virtual doctor apps.

- **Emergency Response Systems**

  Enable rapid assessment and easy transfer of patients through real time location tracking & information transfer from the ambulance.
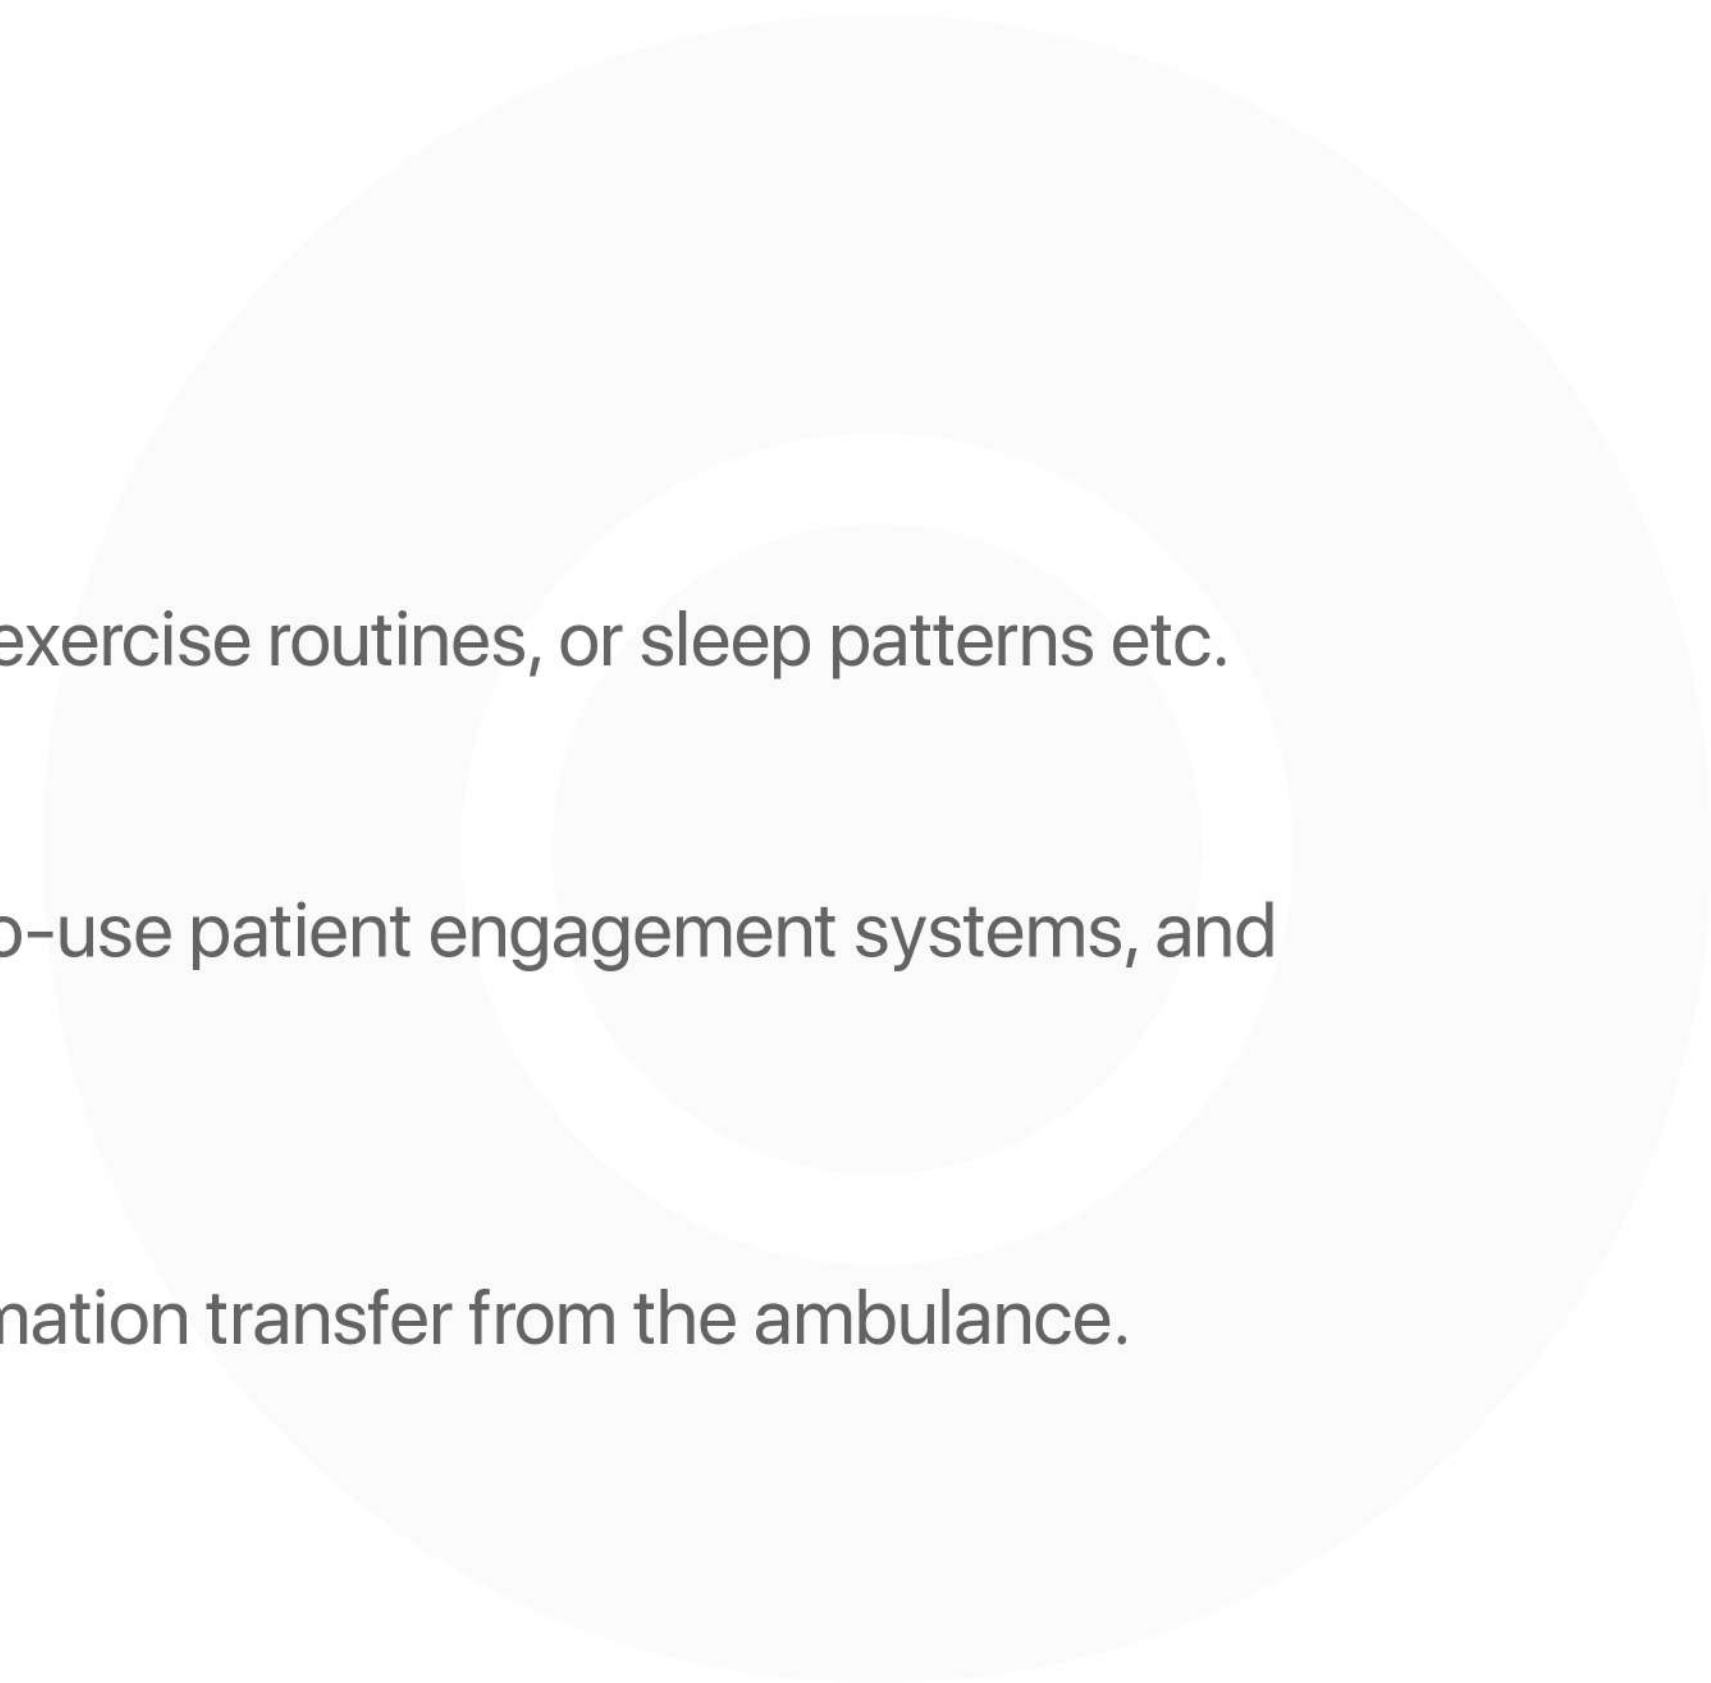

SOLUTIONS FOR
eCOMMERCE

Disruptive tech solutions to simplify customers' journey and engage shoppers in new ways.

- **Shoppable Videos**

  Turn your video content into point-of-sale.

- **Voice Commerce Solutions**

  Redefine shopping experience with voice-enabled interactions.

- **Real-Time Multilingual Chat**

  Unshackle language barriers and transform your customer support.

- **Asset Tracking Solutions**

  Maintain 100% visibility of your inventory and assets.

- **Interactive Live Video Streaming Solutions**

  Engage your audience with immersive live interactions.

- **Custom Retail Solutions**

  Elevate your brick and mortar store through digital transformation.

SOFTWARE & TECHNOLOGY

Helping forward-thinking ISVs develop innovative software solutions with scale speed and optimal costs.

- **Turnkey Product Engineering Services**

  End to end software product engineering solutions ranging from ideation to requirement analysis and development to maintenance.

- **DevOps as a Service**

  Automate and monitor your project delivery pipeline with our cutting edge DevOps practices entailing continuous delivery, test automation, budgeting and much more.

- **On-Demand Team Augmentation**

  Accelerate your delivery timelines or bridge skill set gap through our team of 600+ cross functional technology experts.

- **Offshore Development Center**

  Establish as well as manage dedicated offshore development center (ODC) in India and gain access to world class technology skillset at an optimal cost.

- **Software Maintenance & Support**

  Preventive and proactive maintenance and support services to ensure that your software stays in line with the latest technologies and features.

FINANCE

Helping financial firms leverage tech to reduce risk, boost data security, and optimize ROI.

- **Custom Fintech Applications**

  End to end development of Fintech solutions featuring real time data interactions, payment gateways, custom reporting, and analysis models.

- **Accounting Information Systems**

  Custom Accounting Information Systems (AIS) integrated with smart business intelligence applications, ERP applications, and report generation modules.

- **Finance Management Systems**

  Development of financial management dashboards, integrated with banking & credit institutions to securely monitor and reconcile accounts.

- **Blockchain Development**

  Development of highly-secured and automated systems using Blockchain digital payments, smart contracts, share trading, and digital identity.

- **Robotic Process Automation**

  Drive greater efficiency, compliance and productivity by automating processes such as data collection, reconciliation, payments, customer support etc.
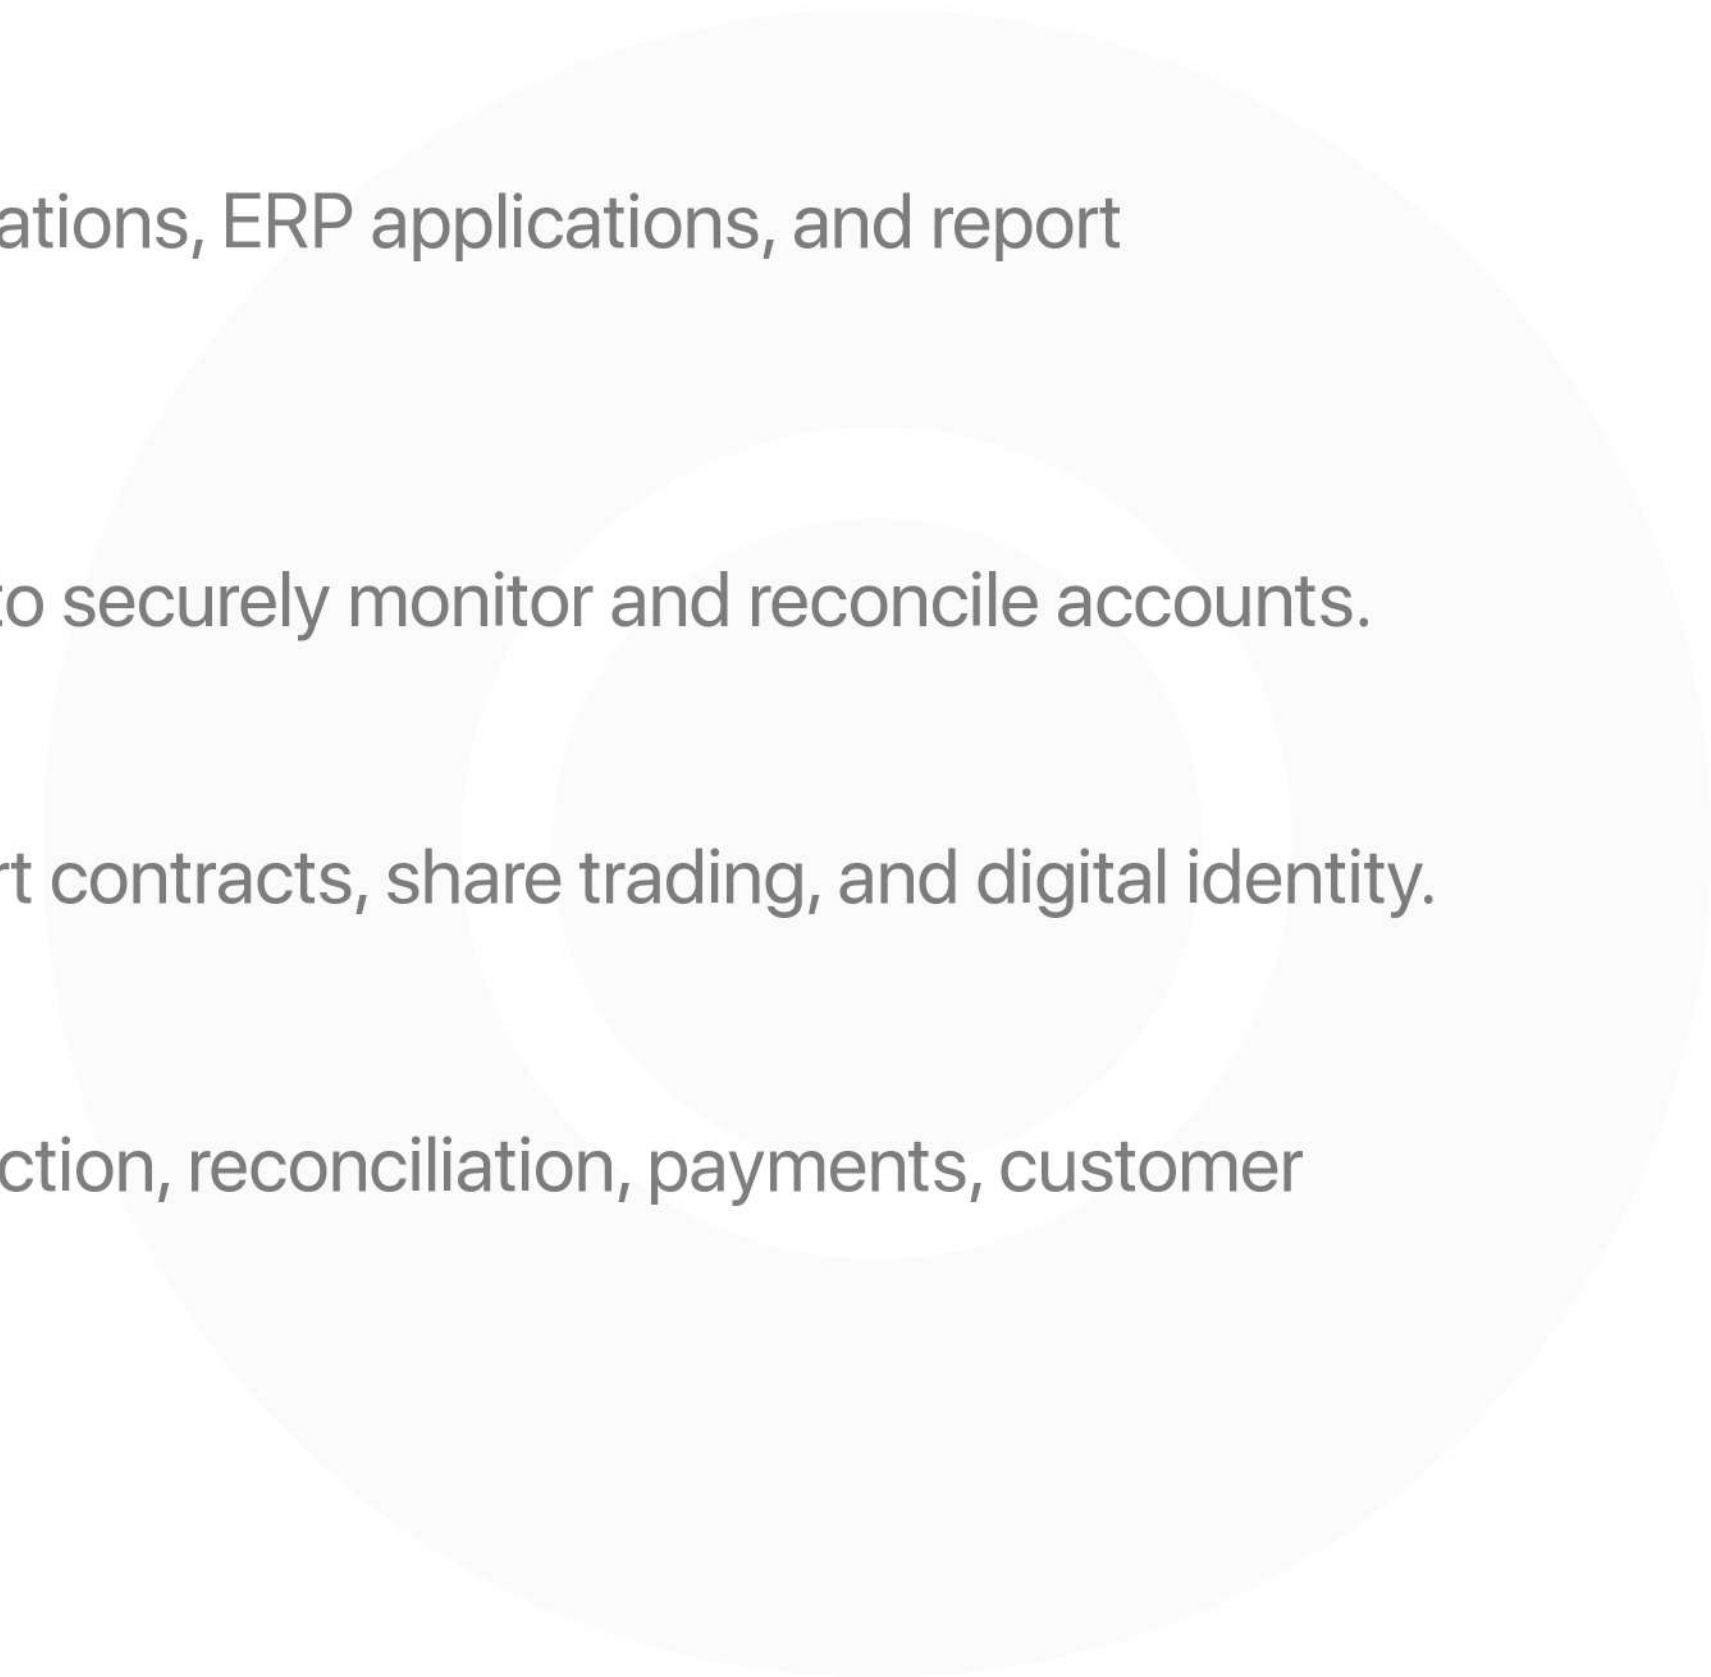

SOLUTIONS FOR
REAL ESTATE

Bridging the gap between buyers and real estate businesses through technology.

- **Real Estate CRM Solutions**

  Custom cloud-based CRM software solutions with smart algorithms, pipeline management, marketing automation, integrated with emails & SMS services.

- **Real Estate Marketplaces**

  Robust & scalable real estate marketplaces with desired business logic, advanced admin dashboards, virtual tour functionality etc.

- **Auction/Reverse Auction Applications**

  Custom applications to conduct offline and online auction/reverse auction of properties allowing collaboration of all stakeholders – individuals, agents, and banks.

- **Mortgage Applications**

  Custom mortgage solutions with features like mortgage servicing, amortization, loan origination with options for online application submission, risk assessments etc.

- **Real Estate ERP Solutions**

  Custom ERP solutions integrated with AI, ML etc. to smartly handle residential and commercial properties data, cash flow visibility, seamless inventory management.
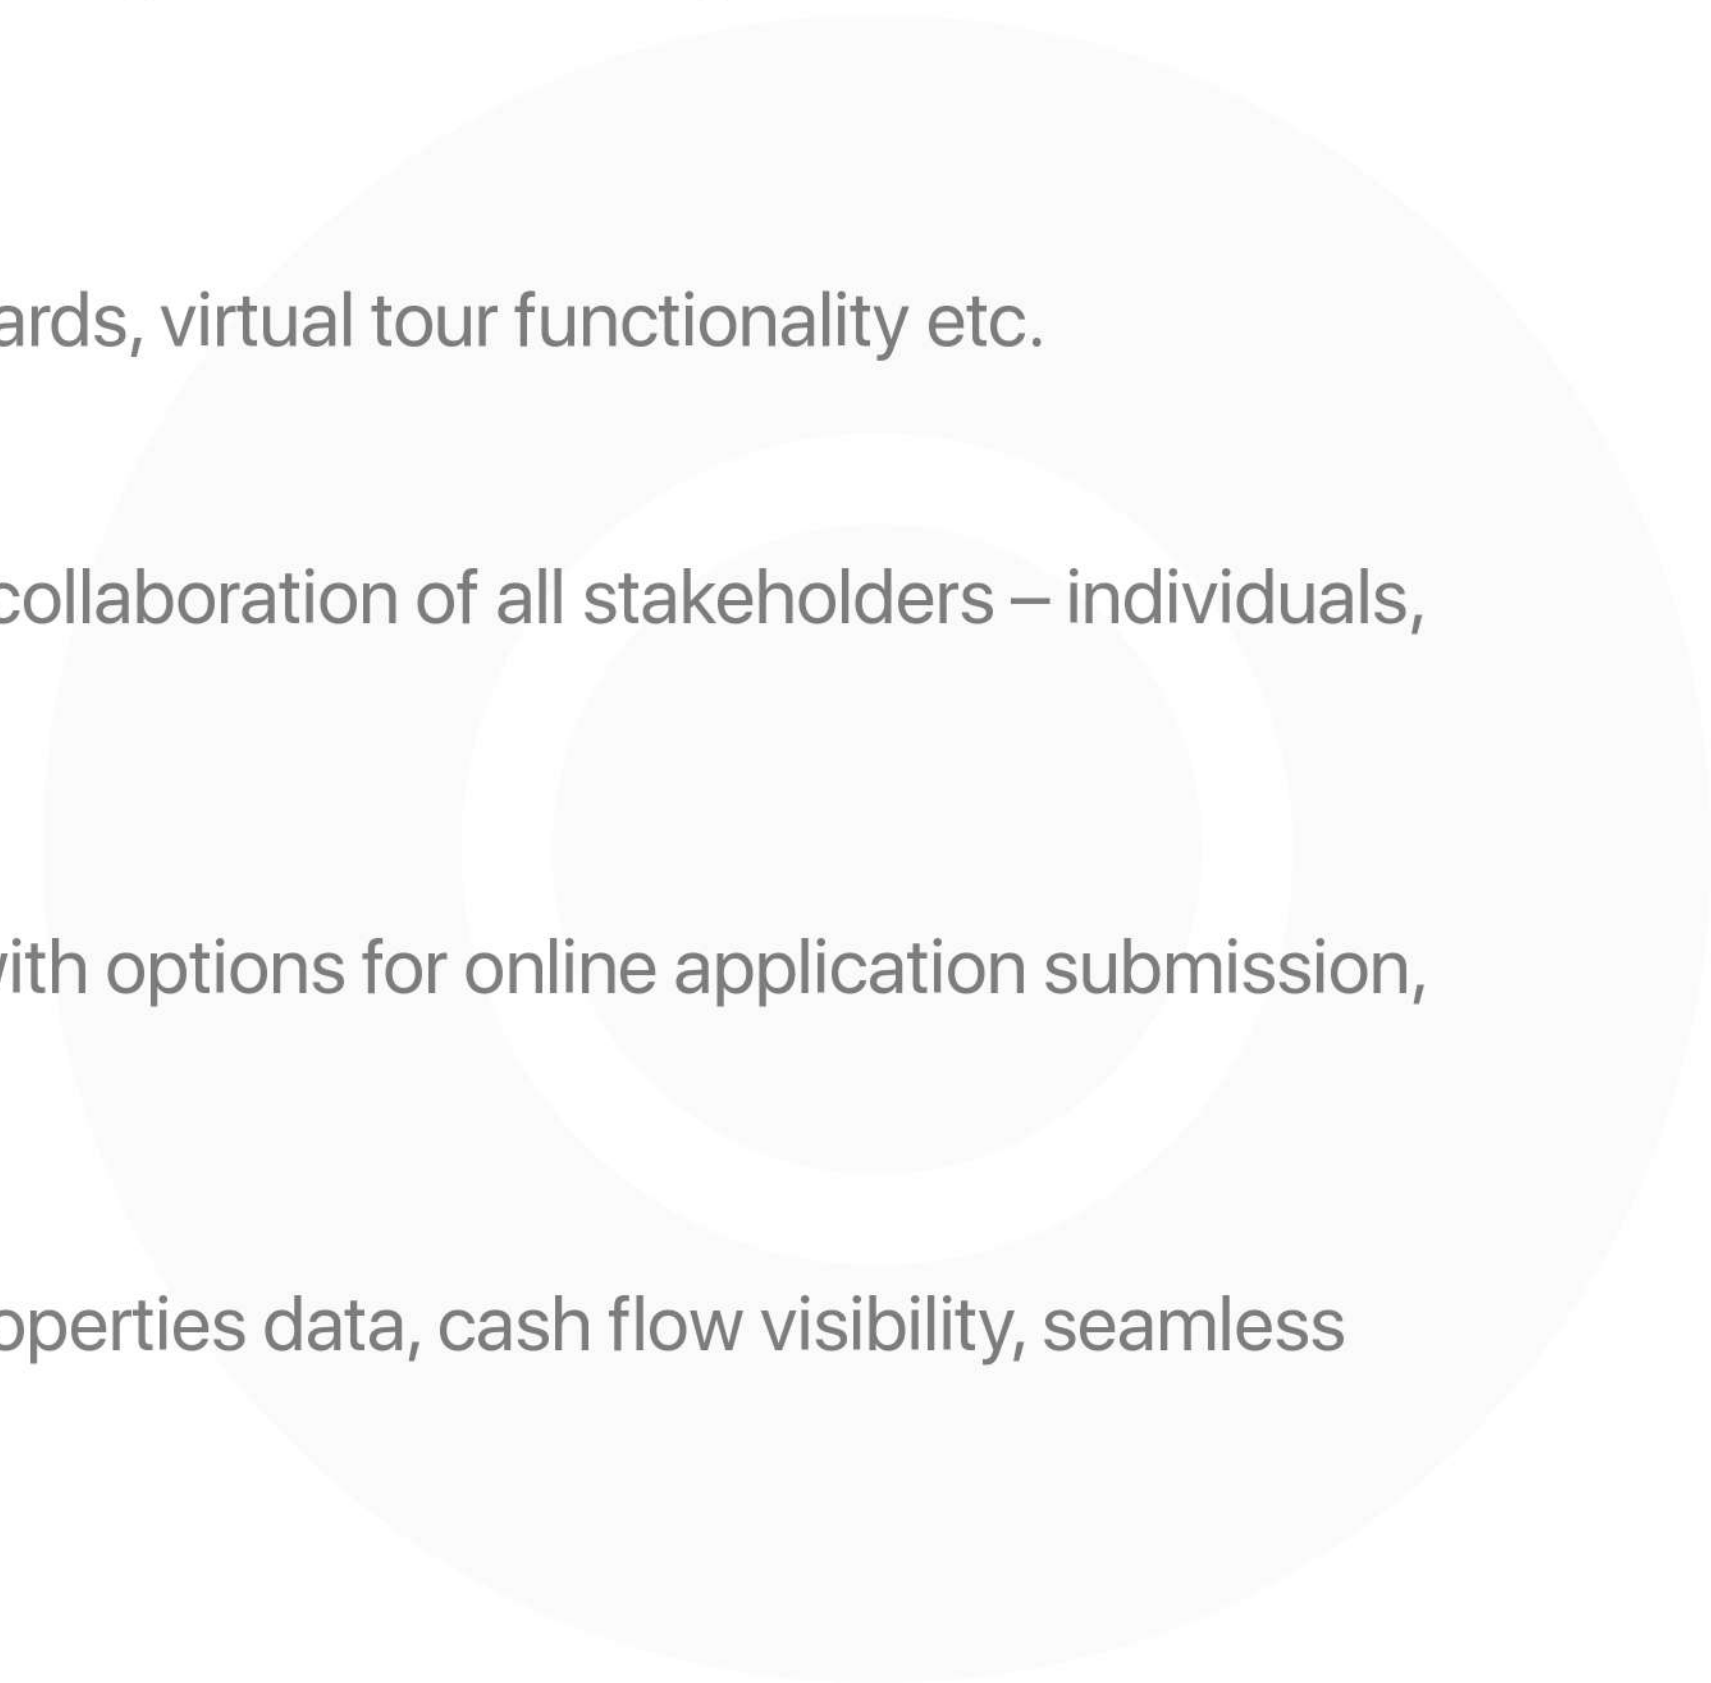

TRAVEL & LOGISTICS

Optimize supply chain, gain real-time visibility, improve productivity and meet delivery benchmarks through technology.

- **Fleet Telematics Solutions**

  Prevent revenue leakage by monitoring fleet KPIs such as travel times, average speeds, routes, and fuel consumption etc.

- **Real time fleet tracking solutions**

  Boost fleet governance and optimize load planning by through real time visibility of your fleet.

- **Warehouse Management Systems**

  Leverage technologies such as RFID, beacons, GPS etc to maintain 100% visibility of your inventory and assets.

- **Process Automation**

  Harness technology to automate your supply chain and boost efficiency, profits and TAT.
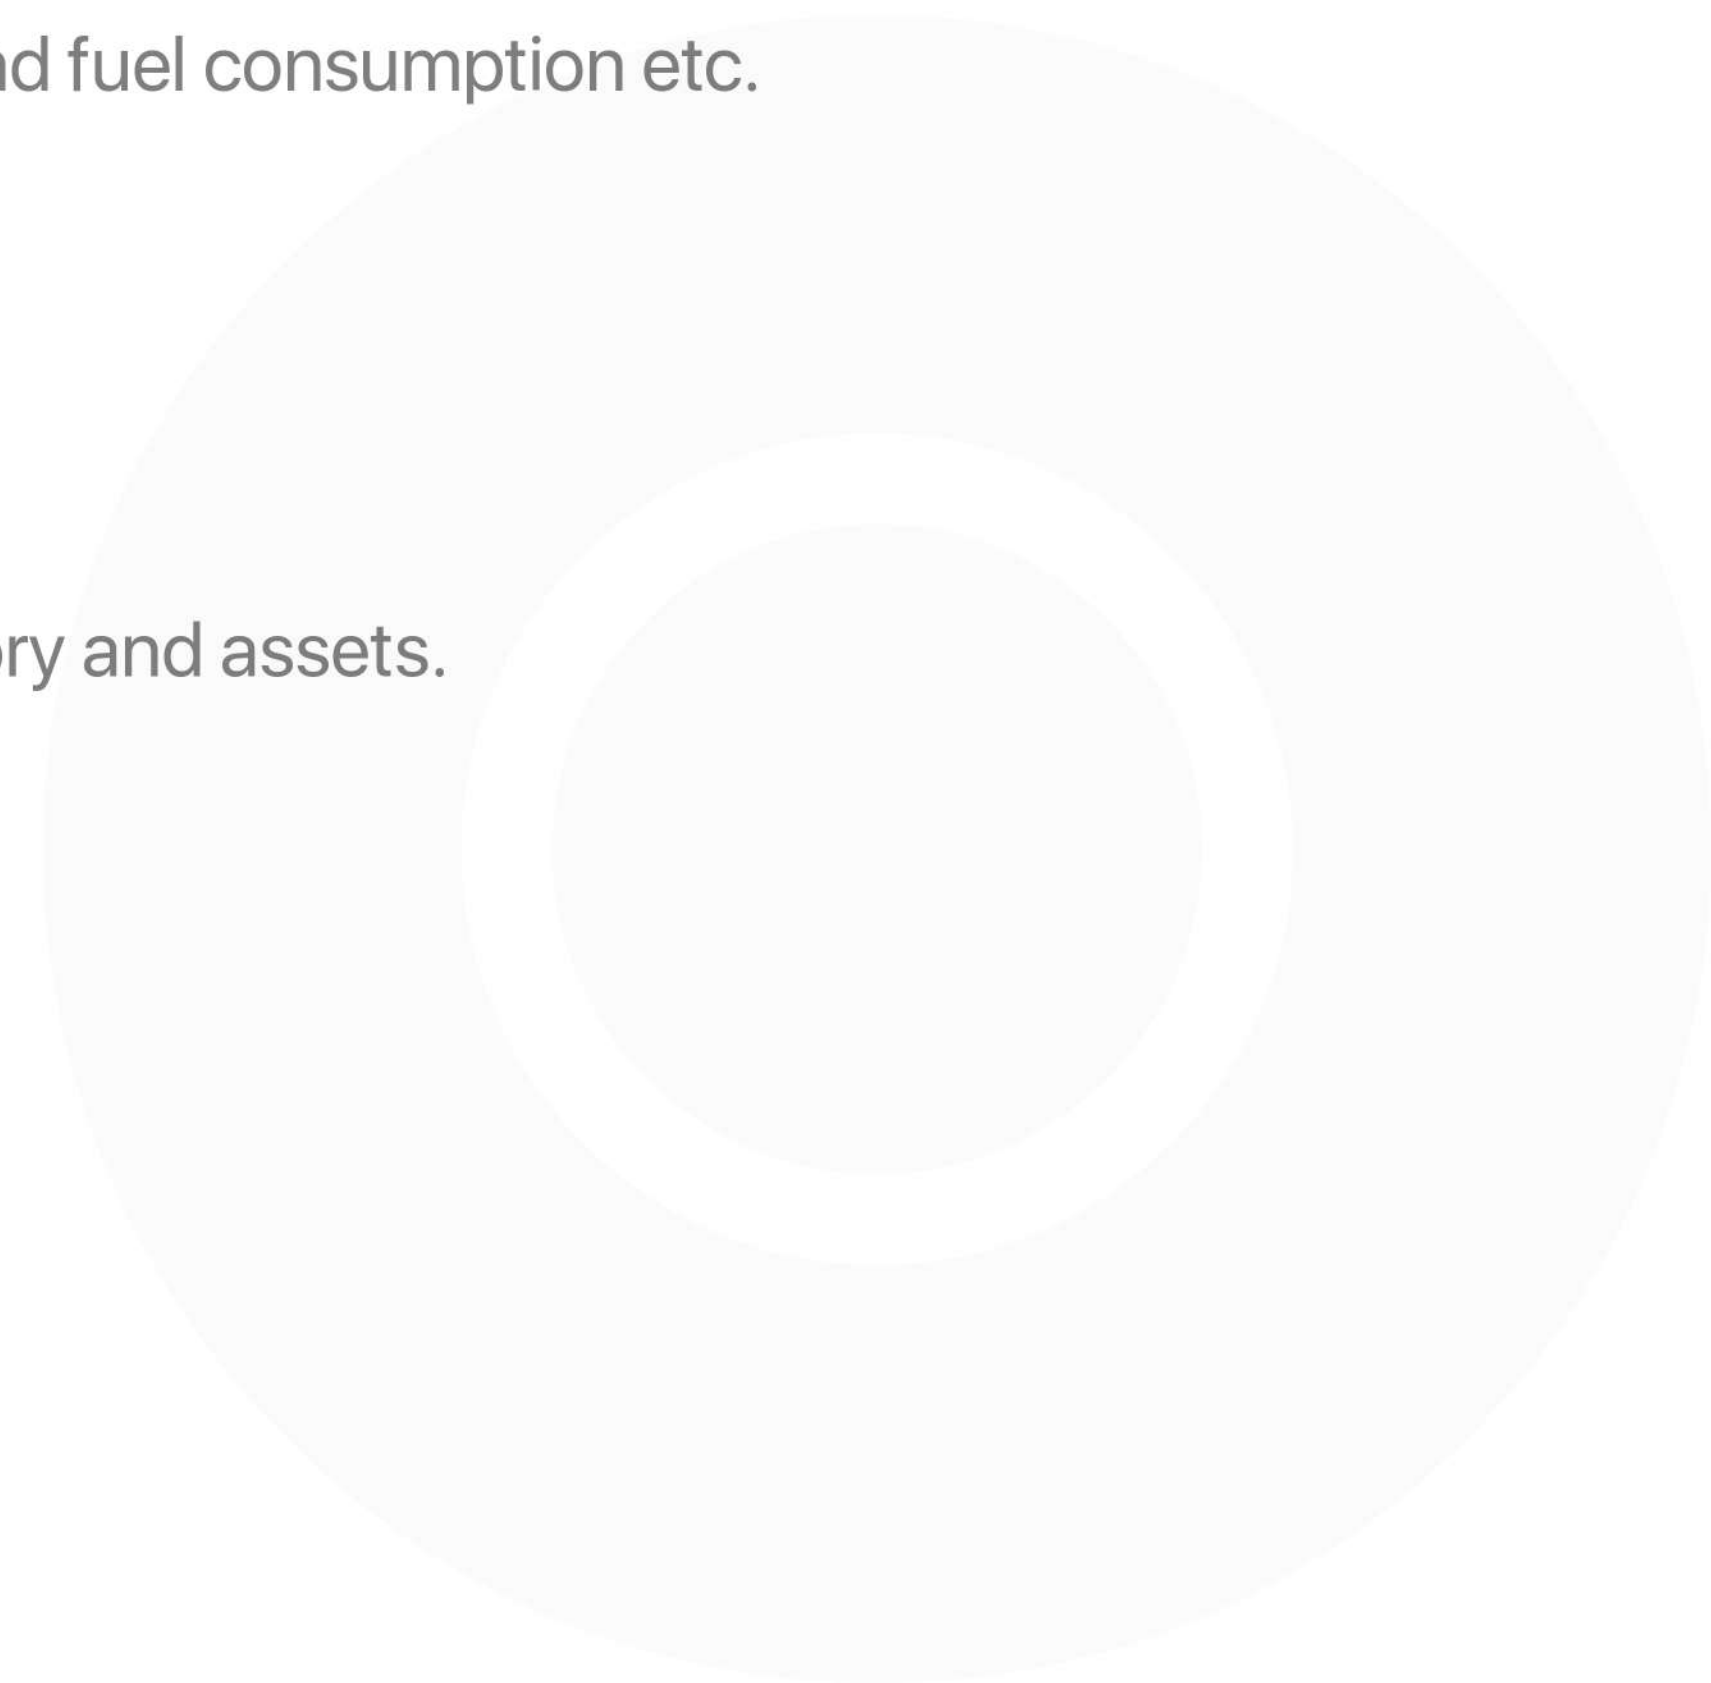

OPERATIONAL EXCELLENCE
MANAGEMENT SYSTEM

Continuously optimize your business process and workflow through our systematic operational excellence management program. A dedicated improvement unit works closely with your business to implement all aspects of the transformation through continuous improvement strategy.

Continuos Improvement

All process & business operations undergo the journey of continuous improvement for the execution of business strategy more consistently and reliably.

Knowledge Sharing

Learning and sharing the best practices for implementation of new technologies and establishing an integrated environment.

Management of Change

Evolvement of people, processes and products as per latest technologies for driving change management.

Risk Identification

Risk are identified, assessed and calculated to decide on futuristic process & equipment.

Risk Mitigation

Implementing controls and monitoring the on-going effectiveness of those controls helps in mitigation risks.

Leadership

Strong leadership to create an organization that focuses on strategic alignement, short & long-term marketing and innovation strategy.

Employee Accountability

Define clear roles and responsibilities of employees to make them accountable for work and achive company's goals.
