PORTFOLIO

Blockchain Solutions

Our robust Blockchain solutions offer dynamic capabilities to various businesses looking for unparalleled scalability and technological advancement. Being at the center of it all, Internet Soft redefines how the world looks at data & digital transactions.

Applying Blockchain across Industries and Professions:

- BFSI & Fintech
- Supply Chain
- Real Estate
- Health Care

Professions

- Security Token Offering
- Blockchain Product Development
- Decentralized Finance Application Development
- Enterprise Blockchain Development
- Smart Contract Auditing
- Stablecoin Development
- Custom Blockchain Development

Platforms We are Experts In

Ethereum	HYPERLEDGER	c·rda	Multichain
EOS	TRON	Stellar	Quorum
Polkadot	Algorand	CARDANO	polygon
Theta	Casper	COSMOS	RADIX

Internet Soft Services

Solution We are Building

Supply Chain Leveraging Blockchain

A Blockchain-based solution helps determine and prove a product's provenance and securely track & trace precisely where the product is in a Global Supply Chain.

Patient Data Storing and Sharing leveraging Blockchain

Internet Soft patient data sharing application leveraged by Blockchain technology helps secure EHR or EMR data, ensuring privacy is never compromised. It also enables you to safely share the data at will with pharmacies, doctors, etc.

Blockchain Solution for Property Title

A blockchain solution for property titles will positively change one thing before everything else: trust between the buyer and the seller. Since records will stay permanently stored securely, there will never be any dispute, eliminating the need for 3rd party title companies.

KYC over Blockchain

Getting KYCs through Blockchain technology is an end-to-end solution that can help tech startups or financial institutions fasten and simplify their onboard customer process, boosting their compliance quotient and saving resources.

Internet Soft Services

Token Sale Investor Dashboard

End-to-end ICO Services

An ICO is the most effective way to gain investments and funding for businesses today. We at Internet Soft provide full-circle ICO services such as platform hosting, token creation, and distribution.

Token Sale Smart Contracts

If you're looking for secure smart contracts for your token sale, you've landed at the right place. Our configurable smart contracts solution will ensure quick and easy deployment for your token sale.

Cryptocurrency Wallet

With the ever-increasing demand for cryptocurrencies and the influx of ICOs in the market, there is a constant need for digital currency security. Enter Blockchain-based wallets! A cryptocurrency wallet is a 100% secure system that allows one to receive, send and manage cryptocurrencies from one centralized portal, making the process efficient and seamless. This also helps investors manage token transactions.

Bounty Campaign Portal

Have support for your business' token sale or ICO, but bounty campaign management seems too harsh an ordeal? Boost your ICO thanks to our comprehensive Bounty Campaign Portal, which brings in all kinds of features and services under one umbrella. All you need to do is make a few clicks, and you can easily manage Bounty Campaigns, irrespective of their scale and depth.

Internet Soft Services

Why Internet Soft / Our Process

Innovation

We believe it is the age of innovative minds where people with the capabilities to think and achieve beyond the limits win the race. Thus, we strive for creative solutions.

Agility

Using our unmatched knowledge and experience, we deliver the business solutions with the utmost skill to make you win an edge over your competitors.

Best of Breed Practices

The continuous urge to be with the changing scenario that we absorb the best practices and, following the same, deliver excellent solutions.

Internet Soft Services

Why Internet Soft / Our Process

Advanced Engineering

Harnessing the power of advanced engineering, we promise to deliver a better user experience.

Collaboration

Blending innovation with creativity, we offer the solutions that match perfectly with your requirements, promising you the scope to reach your goals.

BLOCKCHAIN

Peer

Peer's Initial Coin Exchange is intended to establish a true global standard to qualify and quantify viable projects. It will serve as a new key performance indicator for innovation and allow other established projects to issue tokens

Features

- Substrate based L0 relay chain.

- It has NPOS consensus.

- Users can connect their application specific parachains with relay chains.

- Parachains and relay chains are interoperable via XCM.

- Supports both EVM and WASM based smart contracts.

- Have on-chain governance.

Platform Link

Platform ICX :- https://swap.peerclub.com/

5ire

5ireChain is a layer-1 EVM compatible smart contract platform that focuses on developing a for-benefit blockchain ecosystem based on the Sustainable Development Goals (SDGs) defined by the United Nations (UN). 5ire Chain is both EVM and WASM based blockchain, which means that the developers can deploy smart contracts written in Solidity or any other language that can be compiled to WASM. 5ire Chain also supports the Ethereum Virtual Machine (EVM), which means that all Ethereum-based smart contracts can be deployed on the 5ire Chain network. The decision to support both EVM and WASM was made to give developers more flexibility and choice. EVM is a well-established platform with a large community of developers and a wide range of tools and resources. WASM is a newer platform that offers some advantages over EVM, such as better performance and security. By supporting both EVM and WASM, 5ire Chain is able to attract developers from both platforms and offer a more comprehensive platform for building decentralized applications.

Features

- Substrate based L1 chain.

- It has NPOS consensus.

- It is a sustainable blockchain which allows only users that follow UN sustainable goals to become its validators.

- Supports both EVM and WASM based smart contracts.

- Have on-chain governance.

Platform Link
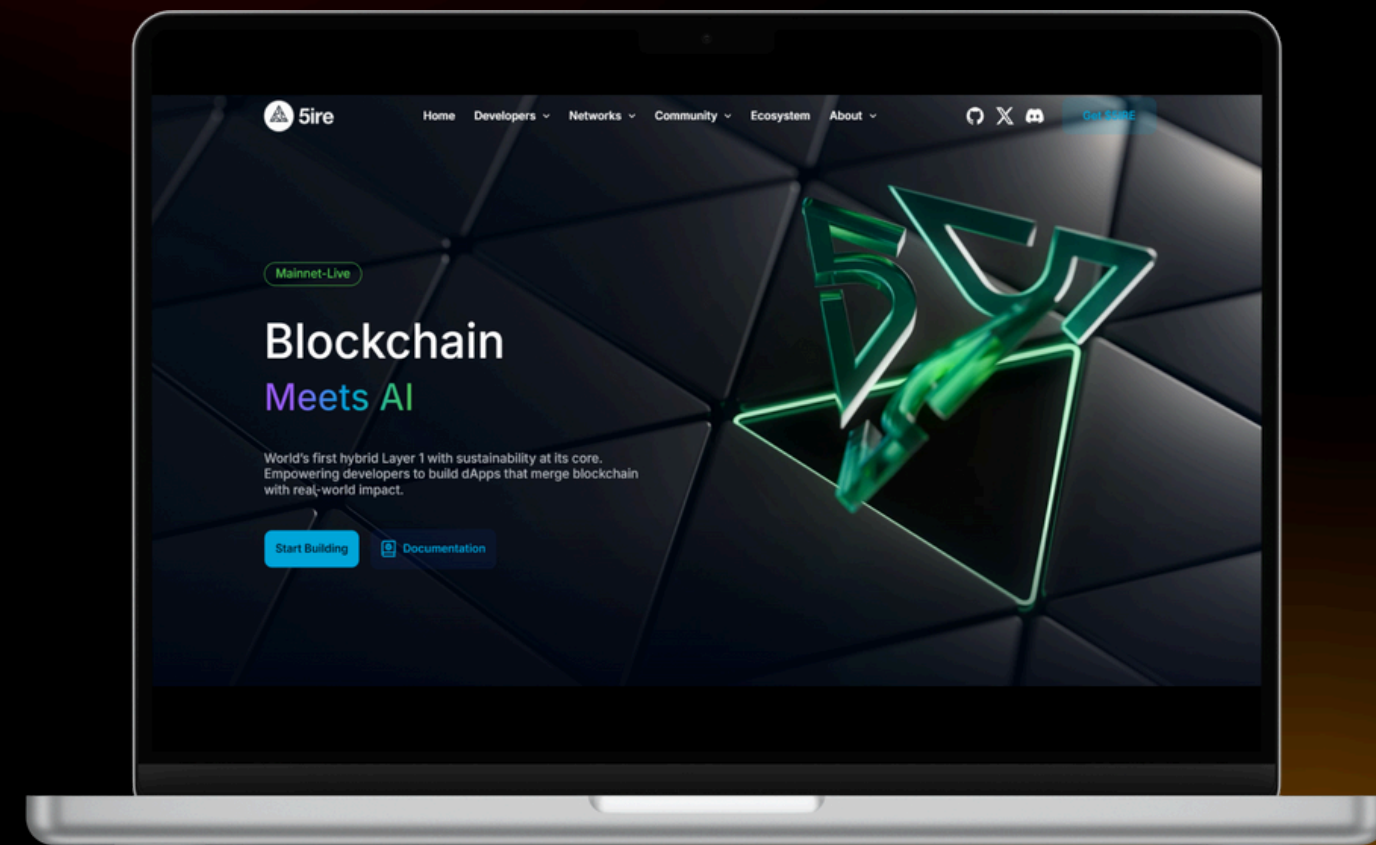

https://explorer.5ire.network/

Belfrics

Belfrics is a WASM based layer-1 permissioned blockchain which allows KYC verified users to access permissioned Dapps which are allowed by the belfrics ecosystem. It also maintains KYC data of users in country specific IPFS clusters. Here the validators are incentivized in credit based systems (A credit represents a currency of a country, For time being it only supports USD-C and INR-C) unlike other Layer-1 blockchain.

Features

- WASM based blockchain which can run rust smart contracts.

- It is built using the cosmos-SDK framework.

- Supports all well known token standards.

- Permissioned ecosystem enabled with robust security mechanisms
