For Medical Imaging Practices, Labs	Practice Management, Medical Image Management, Lab Management, Provider Portals, Patient-Centered Solutions
Patient-Centered Solutions	Telemedicine, Virtual Medicine, Patient Engagement, Patient Apps, Patient Portals, Healthcare AI Chatbots, Chronic Disease Management, Patient Monitoring, Patient Tracking, Inpatient Care, Outpatient Care

SOFTWARE SOLUTIONS EXPERTISE

Collaborative Solutions	Digital Therapeutics (DTx), Care Coordination, Health Information Exchange (HIE), Injury Management For Medical Device Manufacturers
For medical Device Manufacturers	User software for medical devices, Cloud software for data storage and analysis, device management and integration, Biosensor cloud applications, ML-based medical image analysis, ML-based sensor data analysis, AR for diagnosis and treatment
For Pharmaceutical Companies	Clinical Trials, Medication Guidance, Direct-to-Consumer (DTC) Medication Delivery, Physician Portals

HEALTH CARE SOLUTIONS

We build healthcare infrastructure and consumer-facing technology solutions for an interconnected healthcare environment from the back office to the physician's office.
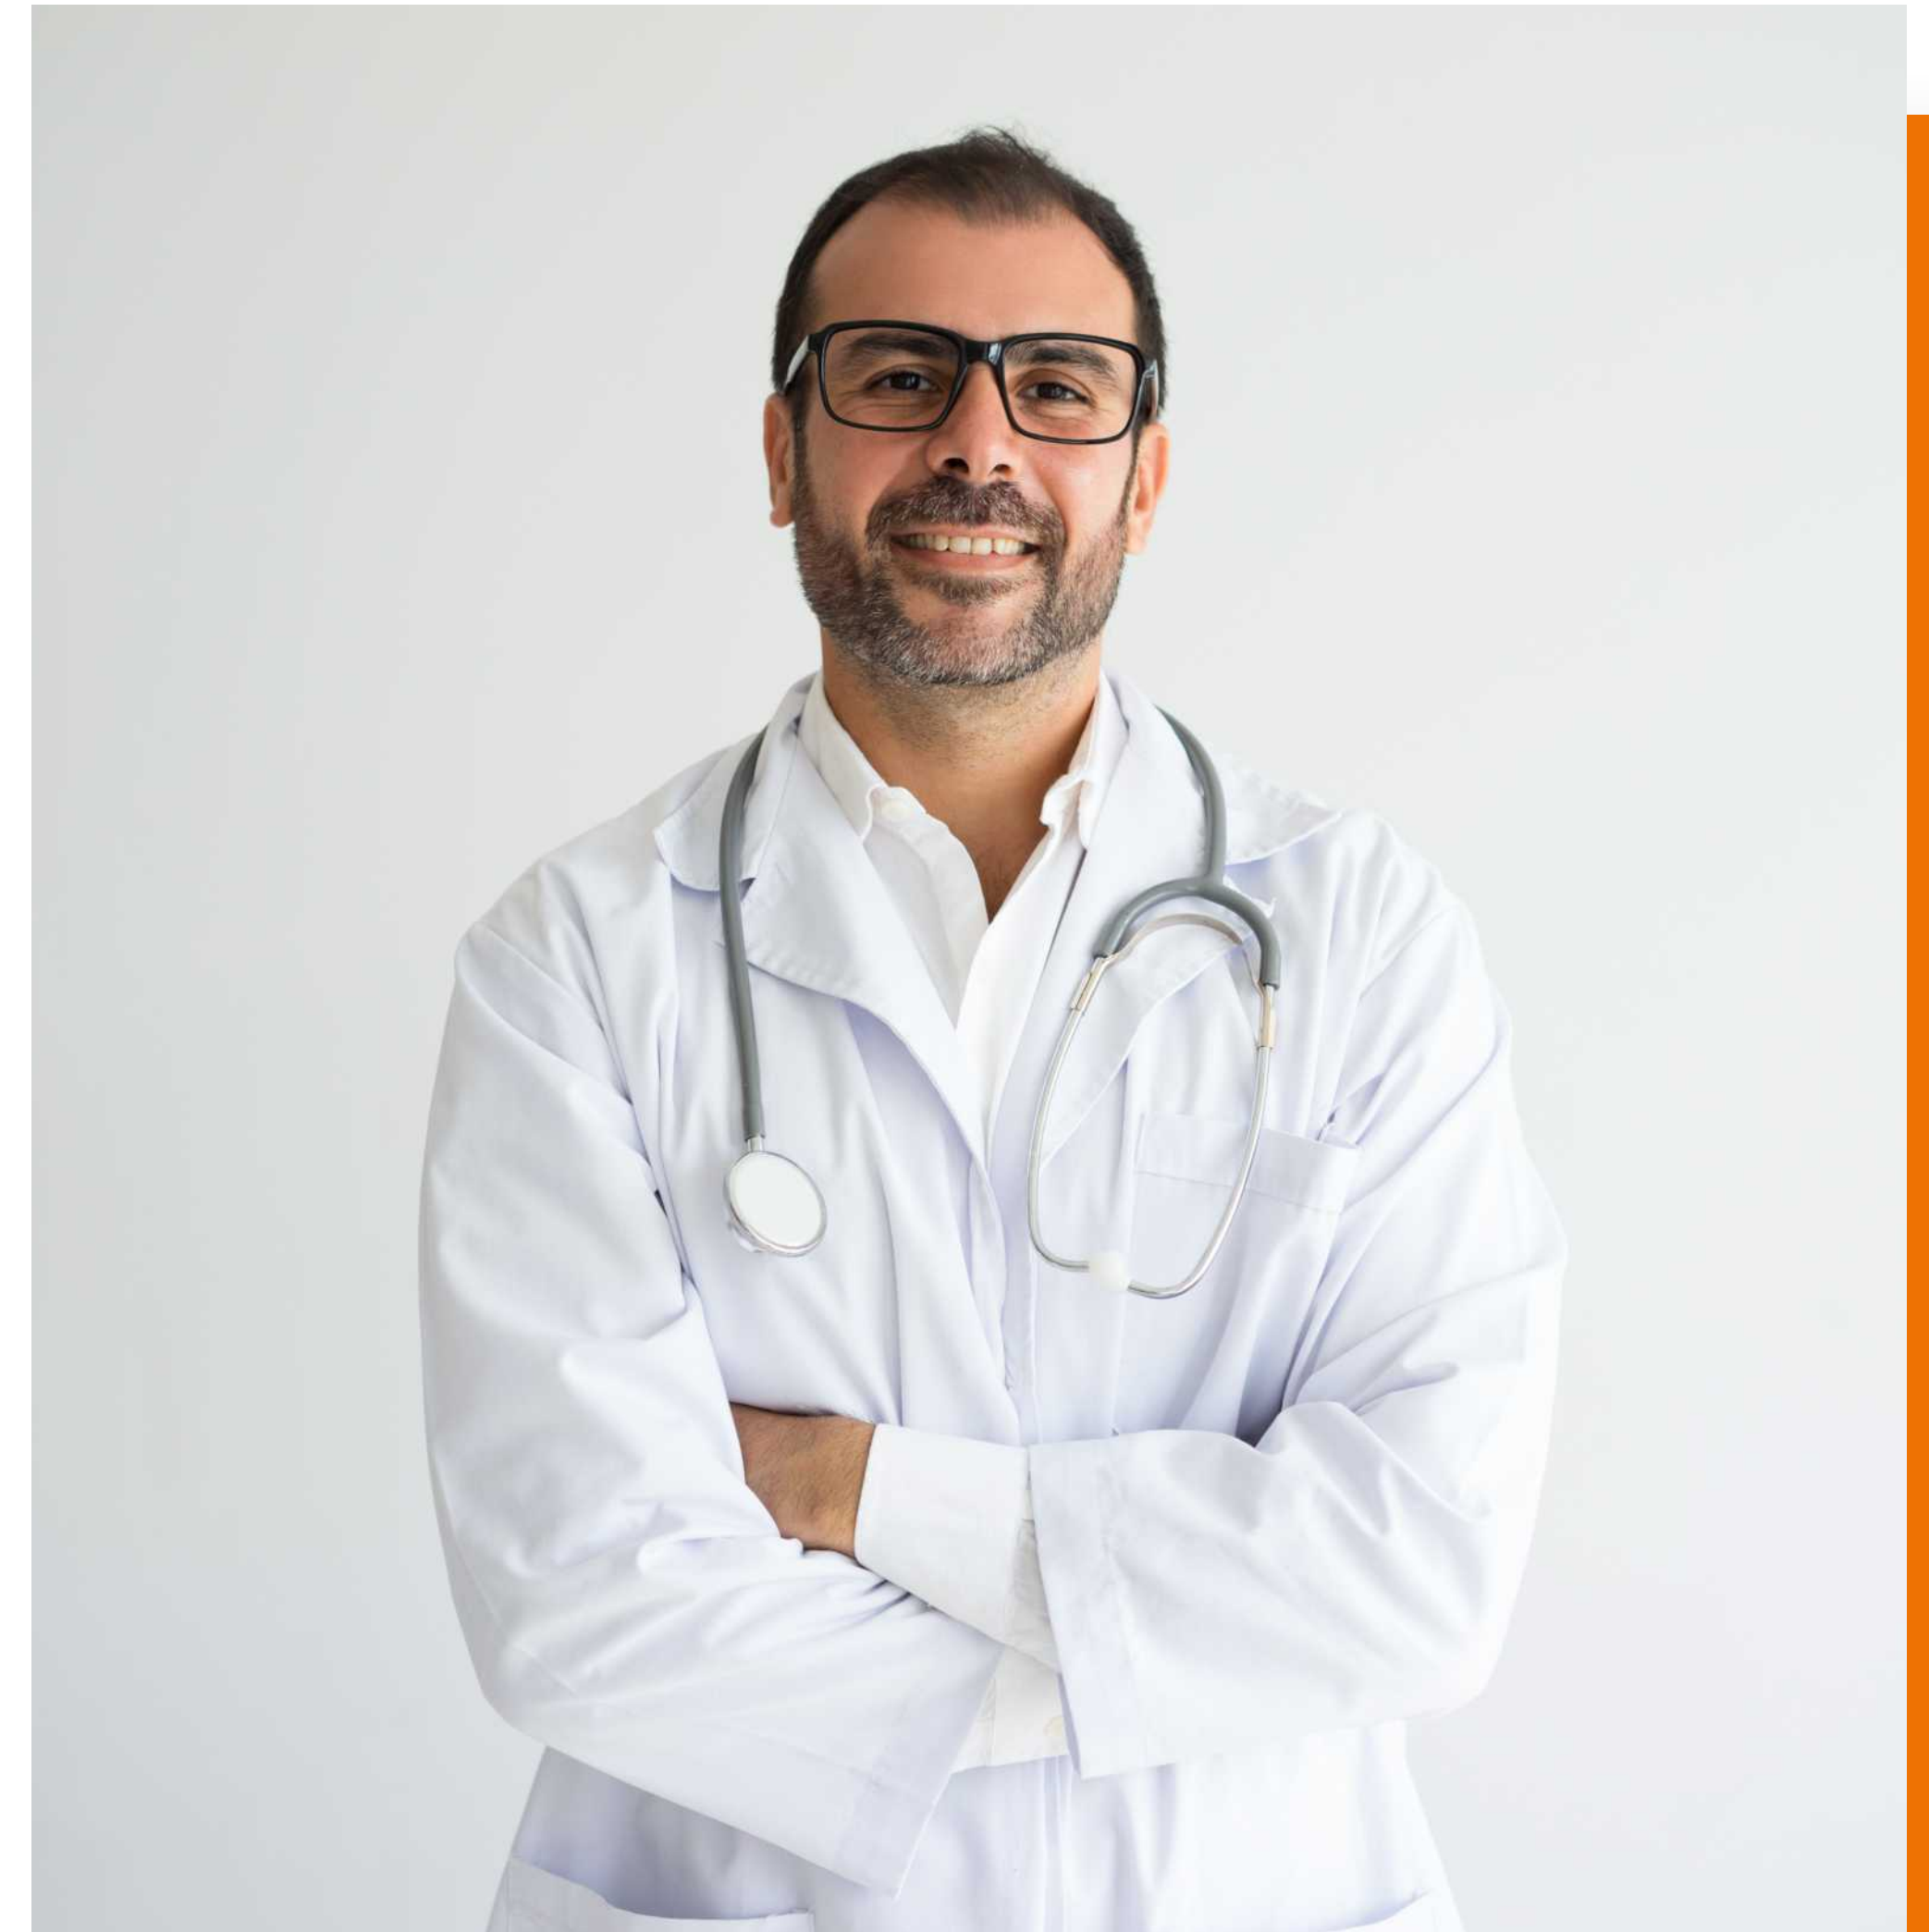

HEALTH CARE SOLUTIONS

Healthcare software solutions that help streamline clinical workflows, maintain patient information, remotely track patient progress and deliver personalized care.

- Medical Practice Management & Operations

- Healthcare CRM and Loyalty

- Medical Billing

- Healthcare Supply Chain Management

- Insurance Claims Management

- Hospital Asset and Equipment Tracking

- Inventory and Procurement

MOBILE HEALTH CARE SOLUTIONS

We create mobile solutions for doctors and patients, mobilize enterprise solutions, including EHR, laboratory and practice management and others, integrate mobile solutions with existing applications and systems.

Mobile Applications For Patients

- Applications to schedule appointments, track and share health, lab results and medications.

- Health Tracking
- Nutrition Applications
- Reminders and Alerts
- Online Consultations
- Educational Applications

COMPLIANCE

We develop software that complies with industry standard XML- and EDI-based healthcare compliance protocols, including HL7, HIPAA X12 and other such formats. Our in-house tools for translating data across industry standards help us to provide faster time-to-market for our clients.
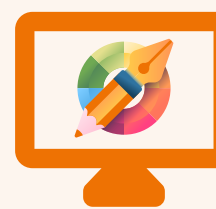

HIPAAX12 Tools

Any-to-any data mapping tool with support for HIPAA X12, EDI, XML, databases, and more.

HL7 Tools

Map HL7 messages in both EDI (v2.x) and XML-based (v 3.x) formats to and from XML, databases, flat files, Excel, and Web services. Can also map HL7 to other EDI formats.

HL7 v3.x Tools

Graphical XML schema editor for viewing, analyzing, validating & auto-correcting HL7v3.x messages.

PORTFOLIO

PROJECT NAME / DRFIRST

Description

and enhance the doctor's clinical view of the patient to help drive better health outcomes. We have implemented and processed the data on the channel according to the integrity of HIPPA with HL7 data exchanging message format.

We have implemented the following HL-7 standards:

- ⊙ Conceptual Standards - HL-7 RIM
- ⊙ Document Standards - HL-7 CDA
- ⊙ Application Standards - HL-7 CCOW
- ⊙ Messaging Standards - HL-7 version 2.x and 3.0
- ⊙ Workflow of Managing the Lab technician data using HL7 format at data processing server.

PROJECT

PORTFOLIO

## PROJECT NAME / DENTSOFT

3 Years
Duration

3
Team

Environment (With skill versions)

Dot Net Framework 4.0, Silverlight 5.0, IIS Server ,SQL Server 2008 ,
HTML 5.0 , DHTML, CSS and Java Script JE 6.0+, Mozilla Firefox ,
JQUERY, HL7, HIPPA, Entity Framework 5.0 , Telerik

Description

Dentsoft is a complete information system for use by dentists and dental
hygienists. The system has a low entry level, and is easy to learn. Dentsoft
is integrated with modern technology/communications
(digital x-ray, email, SMS etc.).

PORTFOLIO

PROJECT NAME / DENTSOFT

Description

It provides high data security with an SQL database, and is suitable for electronic communication throughout the health sector. Includes future-oriented functionality, designed with support for Windows 10. Dentists who have previously worked with paper records or other records programs will quickly recognize the superiority of Dentsoft Dental Practice Management Software.
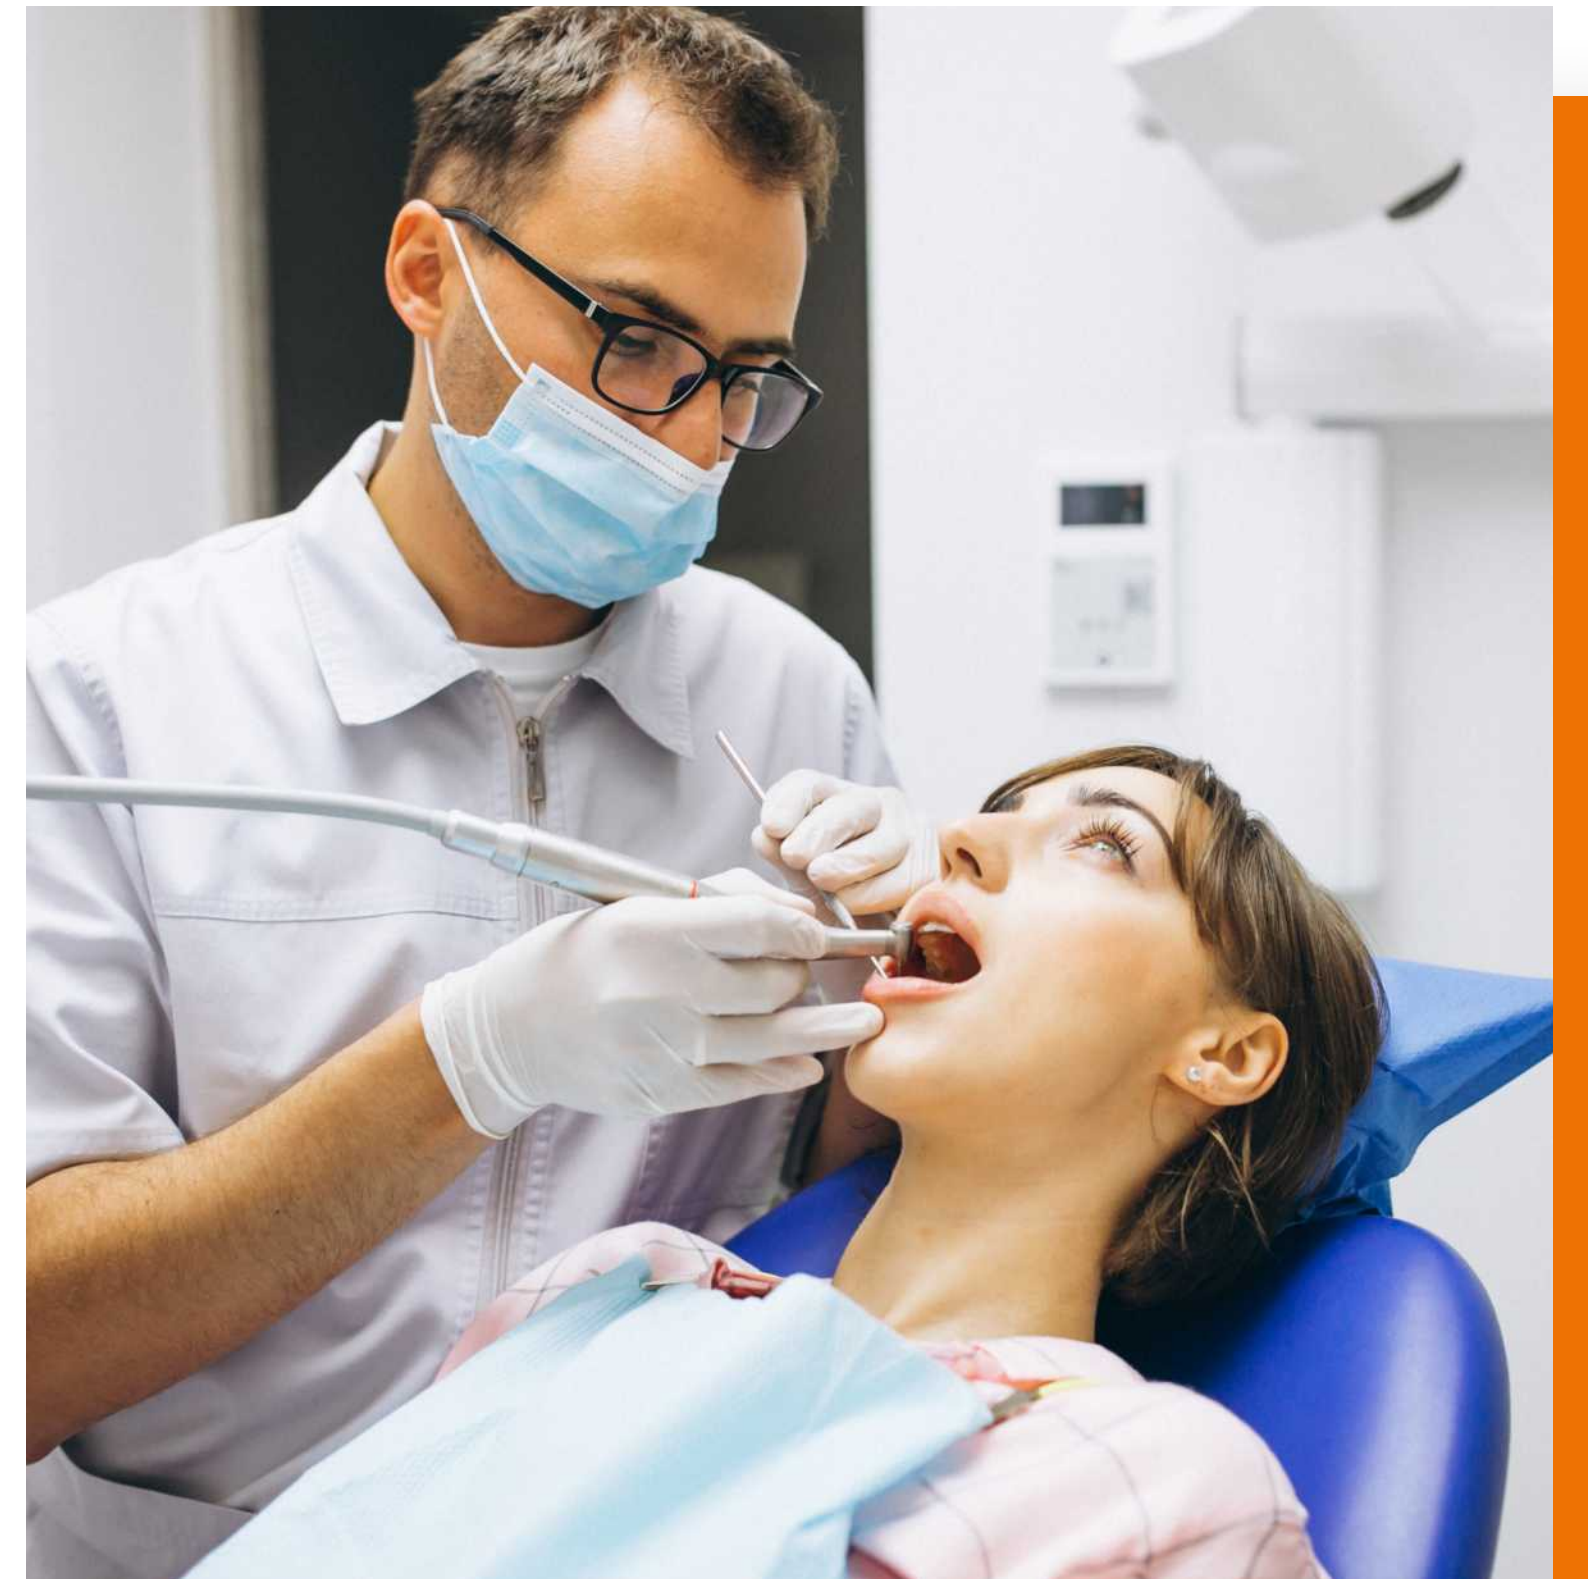

PORTFOLIO

PROJECT NAME / **COBALT SCREENER**

1 Years
Duration

5
Team

Environment (With skill versions)

Dot Net Framework 4.0, MVC4.0, IIS Server ,SQL Server 2008 , HTML 5.0 , DHTML, CSS and Java Script ,IE 6.0+, Mozilla Firefox, JQUERY, HL7, HIPPA, Entity Framework 5.0

Description

The main objective is to develop an HTML5 front-end application that allows Clinicians to administer patient screens over the Internet, and viewable via Internet-connected Mobile Device (e.g. Tablet Questionnaires will be provided by the Super Admin.
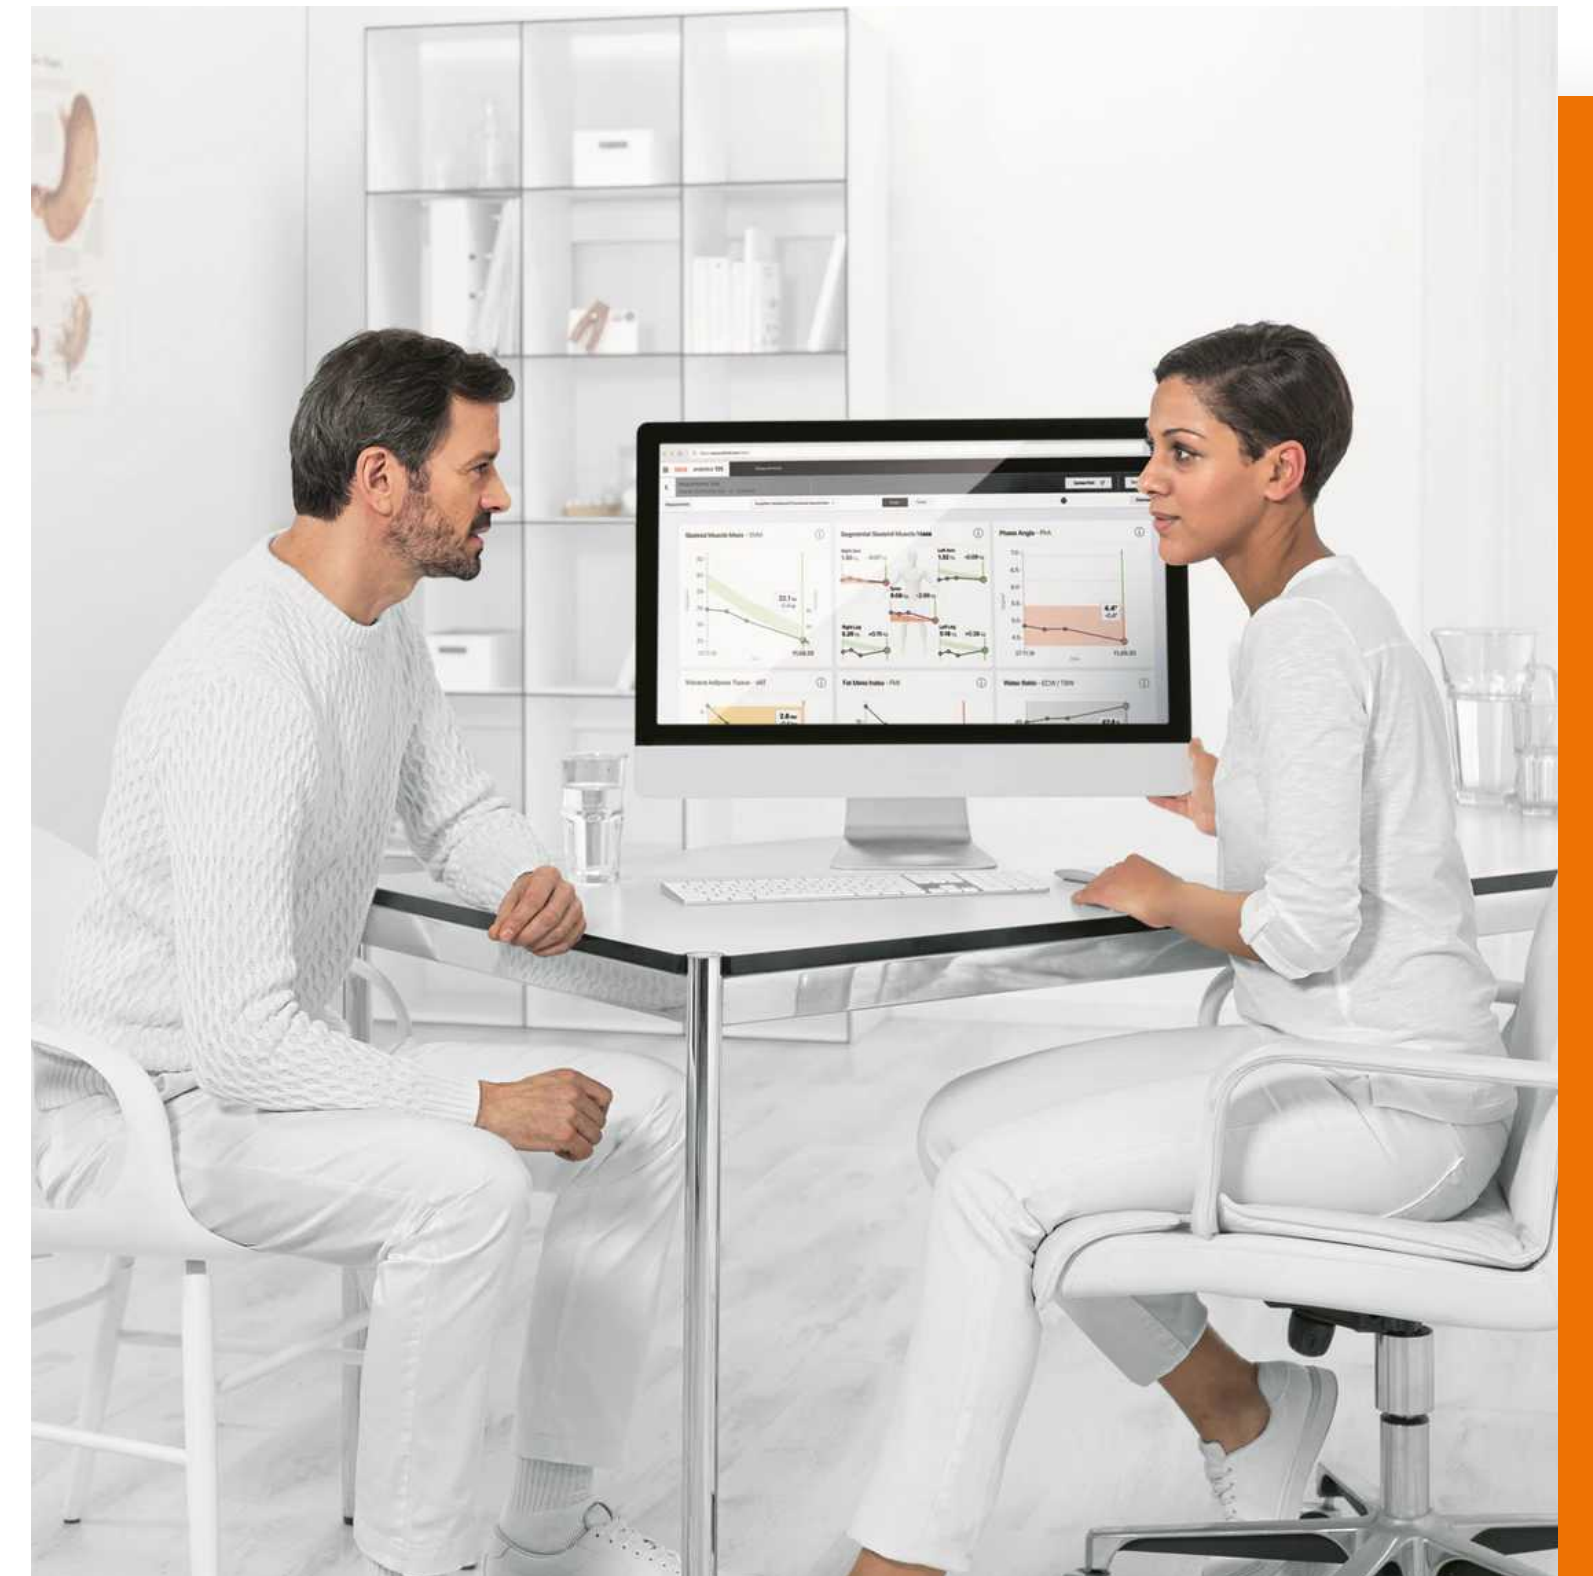

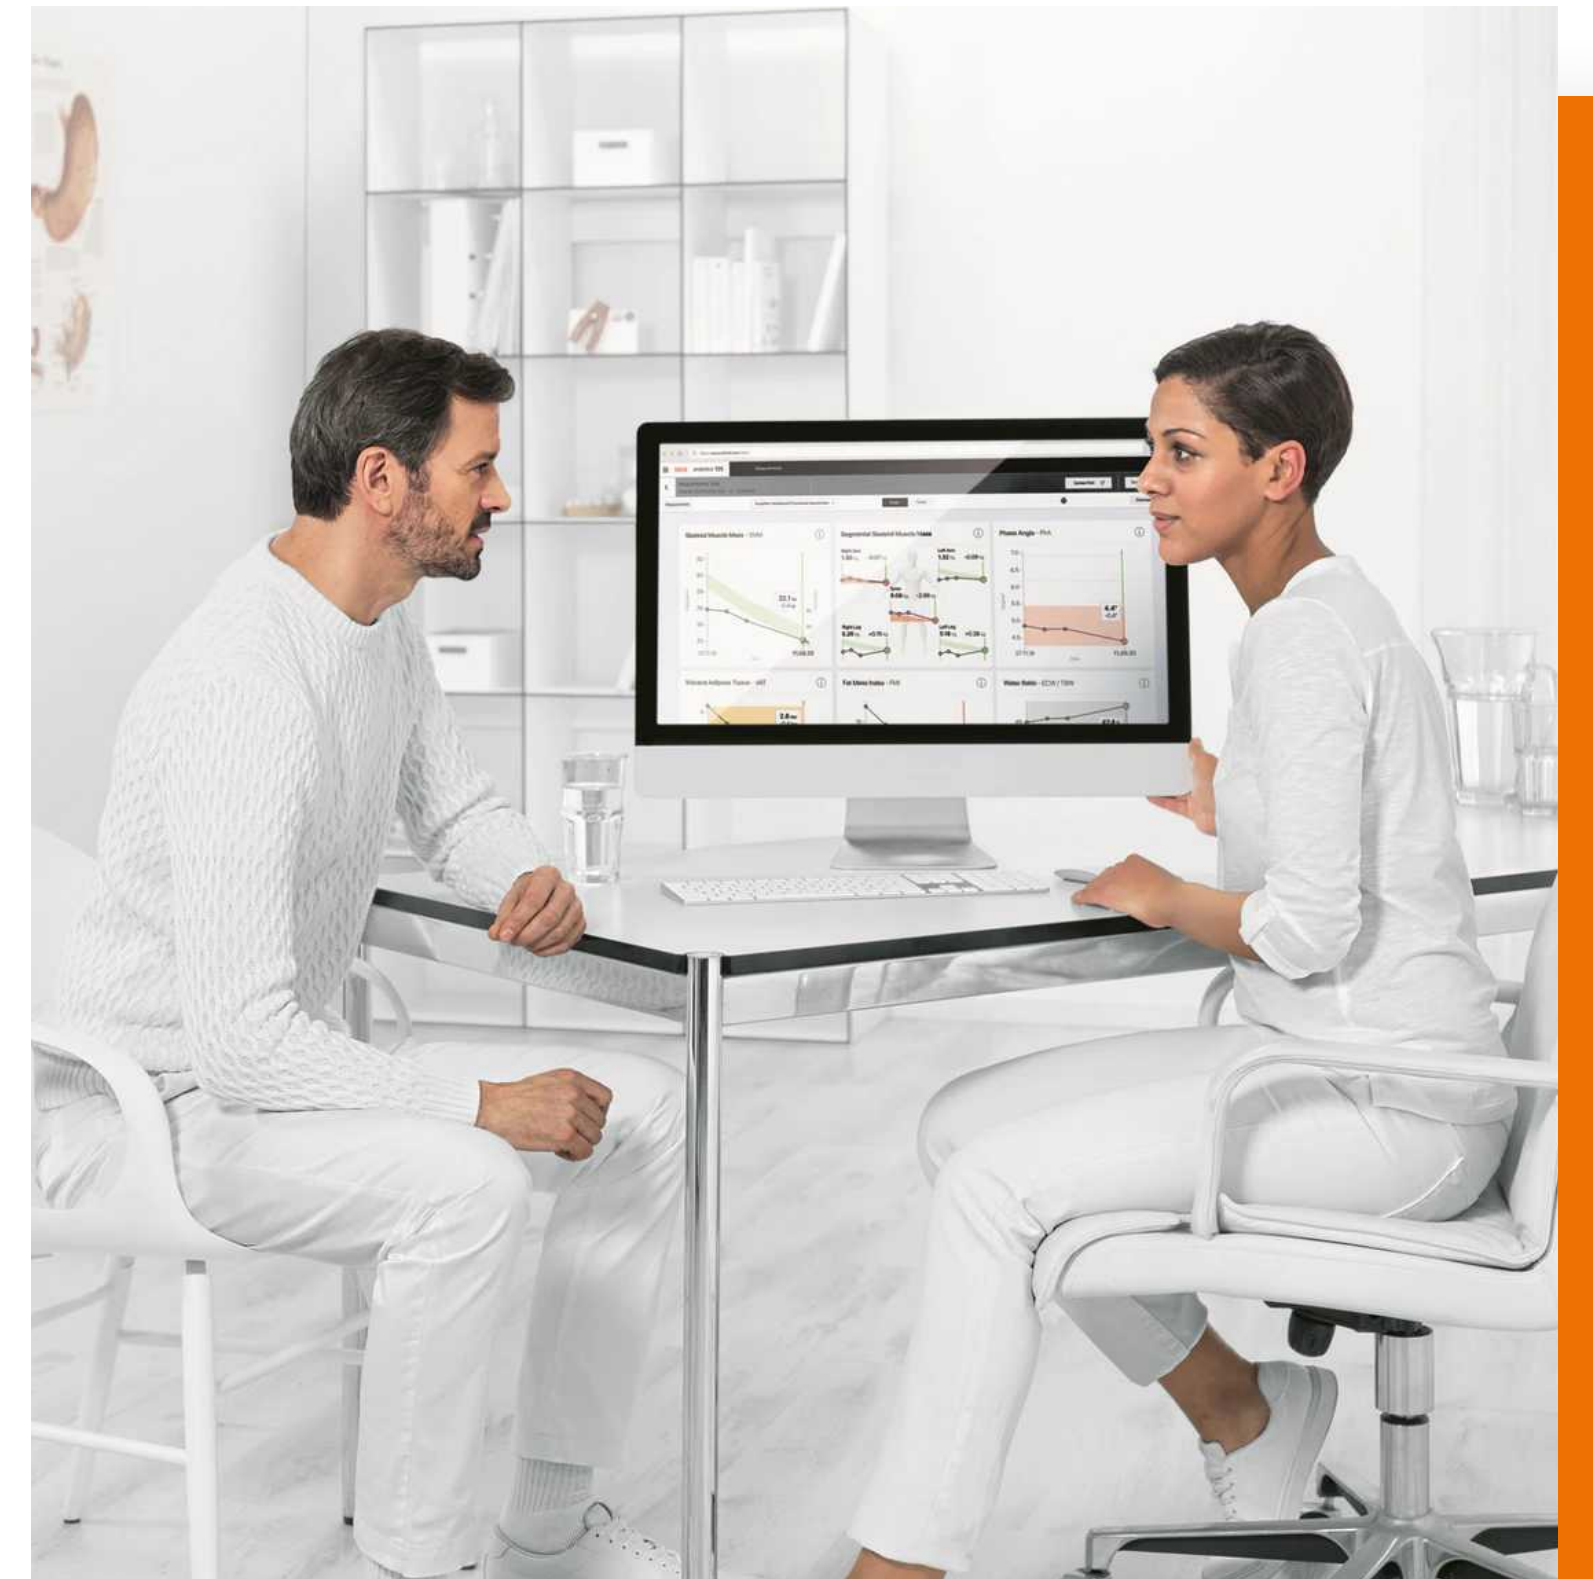

PORTFOLIO

PROJECT NAME / **COBALT SCREENER**

Description

In addition, every test questionnaire will have a pre-defined format of scoring and its evaluation along with set of rules and algorithms which is been managed by the Super Admin. The application will provide Text to Speech feature for the Patients to perform the test in a user friendly environment. The application allows the clinician to Generate the Reports of the Test, Export the Test Result in to PDF format and will be able to send the Test Screening result to the patient via Email or Fax. To perform a Test Screening, the application will allow the clinician to enter a Patient Screening ID. This will be used for time-series tracking of patient data.

This application will be accessed through the web browser and hence will work only when we have internet connection. The project will include a backend component, with a cloud base server, hosting a database which will manage the Clinics, Clinicians and Screening Results, Test Categories/Questionnaires, Rules and Algorithms Engine.

PROJECT
PORTFOLIO

PROJECT NAME / **PANX** (HEALTHCARE)

4 Months
Duration

12
Team

Environment (With skill versions)

MVC 4.0 with Razor, KnockoutJS, jQuery, C#, Dot Net Framework 4.0, IIS Server, SQL Server 2008, HTML5.0, DHTML, CSS

Description

Hospitals are busy places with critical and a lot of information, however paper -based records are still by far the most common method of recording patient information for most hospitals and practices which is not reliable and doesn't allow proper tracking.

PORTFOLIO

PROJECT NAME / **PANX** (HEALTHCARE)

Description

Panx with its advanced location technology is setting out to reinvent the hospital experience with all the communication and tracking handled within the same system and offering client communication, patient communication, better patient satisfaction, removes unnecessary paperwork, location tracking and patient education.
